AUDITORS' REPORT.

TO THE INHABITANTS OF QUINCY:—

The undersigned, Auditors of Accounts, appointed at the annual town-meeting in March, 1886, respectfully report that they have examined the accounts of the Treasurer, and find the same correctly kept, with proper vouchers for all payments. They find that the amount of cash on hand by his report is at his credit in bank.

They have examined the accounts of the Treasurer of the Woodward Fund, and find that he has proper vouchers for all payments, that the balance of cash on hand is deposited in bank, and the securities in his possession agree with the list given in his statement.

They find that the present condition of the Sinking Fund corresponds with the statement of its Treasurer.

They have examined the accounts of the Park Commissioners, and find that they have proper vouchers for all payments.

They have scrutinized and verified the accompanying account of the Selectmen, and find proper vouchers for all payments made by them. The account is correct and properly kept, and the amount of money there stated as drawn by the Selectmen from the Treasurer agrees with the amount charged to them on his books.

In accordance with the standing vote of the town, the Auditors find it their duty to report that the Road Commissioners, Messrs. John Q. Adams, John Cashman and Gordon McKenzie, have exceeded the appropriations for

Highways	.	.	.	.	.	.	\$2,336 59
Removal of snow	.	.	.	.	.	.	387 89
Hall Place	.	.	.	.	.	.	1 49
Newport Avenue Culvert	.	.	.	.	.	.	186 10
Fountains	.	.	.	.	.	.	82 56

The Engineers of the Fire Department, Messrs. John W. Hall, John A. Duggan, Franklin Curtis, William B. Barry, Benjamin King, Peter J. Williams and Amos L. Litchfield, have exceeded the appropriations for

Fire Department \$233 91

The Managers of the Mount Wollaston Cemetery, Messrs. William A. Hodges, George L. Gill, John Hall, Edward A. Spear, George L. Baxter and Joseph H. Vogel, have exceeded the appropriation for

Mount Wollaston Cemetery \$115 16

The last year's financial statement showed a surplus of \$15,-262.41 cash assets above the liabilities. The present statement shows a net debt of \$483.72. The difference is chiefly owing to the fact that the town appropriated only \$10,000 for the building of a new schoolhouse, giving its notes for \$25,000, the balance of the cost.

ELIAS A. PERKINS,
GEORGE H. LOCKE,
H. A. KEITH,

Auditors.

SELECTMEN'S REPORT.

TO THE INHABITANTS OF QUINCY:—

We herewith present the annual financial report, which is self-explanatory. There have been no unusual expenditures under the appropriations which we control, and it will be seen that there are some small balances which have not been paid out.

The land on Adams Street, which was purchased in 1880 at a cost of \$6,000, has been sold during the past year for \$6,625; and the money has been paid over to the Sinking Fund, as directed by vote of the town.

At the last annual town-meeting the Selectmen were authorized to sell the land and building now used for the John W. Hall Hook and Ladder carriage. The Selectmen were of the opinion that it was good policy to sell the property; but as the Board of Engineers have not been able to provide a suitable place for the apparatus, it was thought best to postpone the sale.

The town also appropriated \$375 to make changes and improvements in the lock-up, but upon a careful examination of the premises it was thought to be impossible to make any decided improvement if we made the changes proposed; therefore nothing has been done.

A larger appropriation than usual was made for the police department. In our judgment it has been expended as advantageously and economically as possible under the present system, and we think the business of the department has been carried on in a manner that is creditable to the force. We would call the attention of the town to the policy of having one or more regular police-officers. We deem it a matter that is worthy of careful consideration.

We would also call your attention to the subject of collecting the taxes. With the present rapid growth of the town it would seem proper to make some changes in the present system, and if the usual committee to look after the business of the town should be appointed at the approaching annual meeting, we think that this matter should be carefully examined by them.

WILLIAM A. HODGES,
GEORGE H. FIELD,
WILLIAM N. EATON,

Selectmen.

SELECTMEN'S CASH ACCOUNT.

The Selectmen have received from the Town
 Treasurer during the year ending Feb. 1, 1887,
 as per his report \$156,214 67

They have paid as follows : —

MOUNT WOLLASTON CEMETERY.

THE Managers of the Mount Wollaston Cemetery submit their thirteenth annual report.

Sale of Lots.

Twenty lots have been sold the past year, for which the sum of \$200 has been received.

Grading New Lots, and Care of Lots.

The sum of \$1,438.87 has been charged for work on lots, of which \$1,244.62 has been collected, leaving \$194.25 due and unpaid.

Repair Fund.

An increase of \$750 has been made to this fund, which now amounts to \$3,325, the income of which will be applied according to the terms of the contracts.

Appropriation.

The annual appropriation of \$1,000 is respectfully requested. The Board also respectfully submit, that as it seems desirable that the new ground, enclosed by the change of the line of Valley Street, should be graded and suitably laid out with an entrance and driveway, if possible, near the corner of Valley and Coddington streets, and also in connection therewith the more speedy completion of the filling-in the low land just north, and grading down the steep bluff, a special appropriation of \$500 could be used to good advantage.

Financial.

QUINCY, Feb. 1, 1887.

REPORT OF COMMITTEE ON THE EXTENSION OF THE MOUNT WOLLASTON CEMETERY ON THE NORTHERLY SIDE.

It is very evident to any one who has at all investigated the subject, that it is necessary at once, or in the very near future, that the Mount Wollaston Cemetery be extended in some direction, or new burial-grounds be furnished in some other part of the town. The lots are now sold as fast as graded; and it is estimated at the present rate of increase, that, if the whole unfinished part bounding on Valley Street be brought into use, the supply would not equal the demand for lots, for more than three years.

The vacant lot of land on the northerly side of the cemetery, belonging to the Woodward Fund, seems to offer a favorable opportunity for an extension in that direction, and your Committee, under instruction from the town, have arranged with the Board of Managers of the Mount Wollaston Cemetery, and the trustees of the Woodward Fund, for the purchase of a part of said lot of land, to be added to the cemetery, under the following terms and conditions; viz., all that lot of land lying between the northerly line of Mount Wollaston Cemetery and Greenleaf Street, and bounding westerly on Valley Street, *excepting* a strip two hundred feet wide, the entire length of the lot bounding on Greenleaf Street, *excepting* also lot 33 on the plan of the Woodward estate, which by the provisions of the will is not to be disposed of for some years, and also a strip thirty-three feet wide to be used as a roadway between lot 33 and the before-described land. The price to be four cents per square foot, and with the *condition* that the town authorize and direct the Board of Managers of the cemetery to cause to be set out a belt of trees on the northerly side of the land sold, and between said belt of trees and any lots that may be laid out, to make a suitable driveway. The whole width of said belt of trees and driveway to be not less than twenty-five feet.

This lot of land is about 800 feet in length on the northerly line, 150 feet on Valley Street, and 86 feet on the proposed street which separates it from lot 33, and contains about 94,400 feet. These measurements are not known to be exact, no survey having been made, but are believed to be substantially correct.

Your Committee would recommend the acceptance of the proposition and the taking of the land, believing it to be a necessity as well as an improvement, and the terms and conditions very reasonable.

The cost of the land, as estimated, would be \$3,776, but to provide for contingencies the Committee would recommend an appropriation of \$4,000, and to that end will cause an article to be inserted in the March meeting warrant, asking the town to appropriate that sum, or so much of it as may be needed for this purpose.

It was at first thought by a part of the Committee, that the whole lot should be taken and the cemetery extended to Greenleaf Street, but this is an expensive plan, the land on Greenleaf Street being valuable, and the trustees of the Woodward Fund preferring not to sell for that purpose. We believe if the future needs of the cemetery require more ground, that it can be much more cheaply extended on the southerly side by taking in a part of the town-farm in a manner similar to that reported on some years ago by a committee appointed for the purpose, and the plan of which is now on file in the Town Clerk's office.

Respectfully submitted,

C. A. SPEAR.
JOHN A. GORDON.
WM. B. RICE.
PETER BUTLER.
CHAS. R. SHERMAN.

REPORT OF ROAD COMMISSIONERS.

BEFORE attempting to recount the doings of the year, the Road Commissioners think it would be well to briefly review the circumstances which preceded their taking office. For five years the town had been agitated and divided as to the best method of dealing with its highways. A small but fluctuating balance of opinion seemed at last to incline to place their care in the hands of a permanent commission. This board was, however, of short life, and public sentiment inclined again to the time-honored system of selectmen. Meanwhile, however, the minds of citizens slowly became more and more convinced that by whomsoever administered, it was clear that our highways required to be dealt with upon a systematic and comprehensive plan. This sentiment showed itself in an article which was inserted in the warrant for the annual meeting, in March, 1885.

By the thirty-eighth article of that warrant, the town was asked to borrow money for the purpose of "beginning to construct its highways in a permanent manner."

The meeting thereupon assigned the consideration of the whole matter of "the needs of the town highways, and the best method of dealing therewith," to a large and very carefully selected committee of prominent citizens, who were charged to investigate the entire subject in all its bearings, and report their conclusions in print.

This committee gave a good deal of thought and labor to the work, and at last presented the result of their deliberation and examination in an elaborate report, which was understood to convey the clear and unanimous judgment of all its members.

The important and controlling features of this document were substantially these:—

In the first place, and as a condition precedent to any radical change of treatment in the direction of systematic regularity, it was deemed essential that the work should be assigned to a permanent board, either selectmen or commissioners as the town might prefer; but if selectmen, then to be chosen for three years.

This being assumed as a starting-point, it was next urged that the roads should be classified, surveyed, graded, and the work laid out in advance upon a thorough and comprehensive

plan, which should include a careful system of constant maintenance, and the purchase and care of the best machinery.

Before this report had been acted upon by the town, however, the annual meeting of 1886 had determined to try a Board of Commissioners once more, and had chosen the subscribers for one, two and three years respectively, to serve in that capacity.

Subsequently, the town referred to them the report of this committee, for their information and guidance, and appropriated the unprecedented sum of \$25,000 for the ordinary repair of highways, and for the purchase of machinery.

The Board was at first somewhat doubtful, in view of these facts, exactly what course to pursue. They hesitated whether they ought to regard the action of the town as mandatory, or merely advisory; whether they were in duty bound to contract forthwith for all the most approved machinery, or whether they might not be justified in taking time to study the situation, and perhaps try some practical experiments for their own instruction and for the information of their fellow-townsmen.

Several considerations inclined them to postpone, if possible, an irrevocable decision until a later day. In the first place, it seemed only prudent to allow the town a year's trial of their new Board, before assuming in the face of recent history that the next town-meeting would concur in making it permanent. Then the Board felt by no means sure that after a practical exposition before their eyes of the character and extent of the enterprise to which the report seemed to commit them, the voters of Quincy would not shrink from the inevitable expense, however desirable all might feel the end to be. Thirdly, it was thought expedient to show the towns-people who had never happened to see the machine in operation, the actual value of the steam-roller at work. And finally, it was found that a twenty-ton roller, which is believed to be the cheapest tool to be had for road-making, with its house and land, water-carts, a rotary screen and accessories, would absorb nearly nine thousand dollars of our appropriation. Thus we should have started with a balance utterly inadequate to supply work for our machinery, to say nothing of current expense for necessary ordinary repair, and ignoring entirely at least one exceptionally heavy demand for rebuilding culverts damaged by the great freshet of 1886.

After weighing these and other pertinent considerations, the Board at last settled upon a resolve to devote the year to study and trial of the safest plan of permanent improvement. In the mean time, they agreed to do nothing which could not be

advantageously worked into such a plan when perfected. In furtherance of this resolution, it was determined to combine with the reconstruction of the culvert over Furnace Brook, near Mr. Butler's house, the rebuilding, upon the best attainable grade, and in what we deemed a sufficient manner in every respect, a section of the great trunk road from the Town Hall to Neponset Bridge. In comparison with this specimen of a high-class way at the southerly end of the road, it was originally planned to lay half a mile of the roadbed on the northerly end next the river with a middle strip of pavers fifteen feet in width, flanked on each side by macadam. That the cost of either kind of construction would be exceedingly heavy, if it was really well done, no intelligent man ever doubted. But we thought it right that the town should know exactly how heavy it must actually be under as honest and efficient supervision as we could command.

And since it may be ignorantly charged that the Board has furnished a better and higher cost article than the occasion called for, it may be proper here to say, that there is probably no unpaved piece of road in the world which is subject to a more tearing and destructive traffic than this very piece in the town of Quincy. Not so much that the quantity of travel is enormous, as that the quality is intolerable. One granite-wagon with ten or fifteen tons of stone, which punches out the roadbed with its sharp, narrow tires, like a gouge, does more to demoralize macadam than one hundred loads of moderate weight or broad wheels. No ordinary surface can stand such treatment for an instant: very good foundations shrink and yield like putty; and it is doubtful if even the best macadam that the most careful hands can lay, or the most ponderous roller pack, can long resist such severe treatment. But while we disclaim all prophetic gifts, we confidently appeal to experience to verify our assertion that the specimen which has been finished as a sample, for the information of the town, on Hancock Street, will be found on trial to be not one whit too good, if, indeed, it be good enough, to stand the usage which it was built to endure. If the Board is not entirely mistaken on this point, an important consequence follows. Such road cannot be built without the tool which the town hired to do that job. Any one who was at the pains to scrutinize with intelligent curiosity the Newton machine at work last summer, appreciated at once the peculiar power and efficacy which a steam-roller brings to bear upon a scientific roadbed, and no such person will question the statement that it is absolutely indispensable for any thorough road-building.

If this be true, and if the town is determined to reconstruct the Neponset turnpike in a manner answering to its importance, and treat about six miles more of way substantially if not precisely like it in somewhat similar style, then we come face to face with a computation something like this: For first cost of machinery and its incidents we must allow in round numbers \$8,000. But this first cost entails a second much larger consequential outlay. For, having such expensive tools, it is economical to work them steadily during the favorable season. To supply suitable material, however, and sufficient auxiliary manual labor to prepare and arrange broken stone upon the roadbed for the roller, requires a very large outlay for hire of men and horses. To finish in every respect completely one mile of first-class way, we think will require not less than \$15,000. And by "first-class" in this connection we must not be understood to claim that it will be as good as can be built; only that it is as good as we think Quincy need try to build at present. To pick up, remet, re-surface, and roll down worn-out second-class way will require about \$5,000 per mile; while mere picking, reshaping, and partially refurnishing and rolling down third-class way, may probably be fairly done for something like \$1,000 per mile. To work our machines to advantage, we should expect to deal with at least one mile of the first-class, one of the second-class, and about three or four miles of the third-class of way in each year. This estimate makes no account of any possible demand for our roller by neighboring towns, which might keep it in use at a fair rental when we did not need it, and thus enable us to reduce our outlay for auxiliary force and operating expense, for the reason that we prefer to avoid meddling here with contingencies as much as may be. If it can be arranged, so much the better, but we should not count upon it. And in this connection it is needful to insist upon another element of cost which is as indispensable to such a plan as either machinery or continuous direction, and that is a permanent provision of material. Good roads require enormous supplies of crushed stone and good gravel. And these supplies must not be casual and precarious, but certain and unfailing. It is desirable, but not essential, that they should be near to the great lines of consumption. But whether near or far, they must be ample, and they should be owned by the town. It is not necessary for the Board to fix in this report the precise locality and extent of the quarries and gravel-banks which they might deem it expedient to select for this purpose. It is sufficient to point out the urgent need of such supplies, and to indicate the probable immediate outlay which they would call for.

We should not feel safe in fixing our estimates for such land purchases as ought to be made immediately at less than \$2,000. We have thus attempted to approximate the first cost of machinery with its incidents, the expense of auxiliary labor and service, calculated upon a scale of full activity for our costly engines and the probable investment for deposits of material. There still remains the very considerable item of what may be called miscellaneous repair and incidental expense, which cannot at present be rated below \$8,000 or \$9,000 a year. This comprises a multitude of isolated and exceptional calls which are too numerous to specify and impossible to foresee, besides ordinary superficial care and maintenance. It is obvious that the town will be called upon for a very considerable effort. But in case it decides to commit itself by so large an appropriation to a thorough and permanent scheme of reconstruction, then we feel bound to declare our opinion that it must supplement that action by a further step if it expects to secure satisfactory results. We are of opinion that the money will be largely wasted unless it be laid out under a trained and salaried expert, who shall supervise the work under the general direction of this Board. It is not possible for us to give that minute and incessant scrutiny and continuous care for every detail which the successful conduct of an undertaking involving such sustained and concerted exertion demands. The stake is too great to trifle with. It requires very judicious and skilful management, — the soundest judgment to plan, and the most anxious vigilance to execute. Besides this, we are convinced that it is no longer possible to put up with the absence of system and method which at present characterizes the surroundings of the Board. It has no suitable office to arrange or preserve its papers, no clerk to keep its accounts or record its proceedings, and no method of registering, systematizing, or ordering its business, which might render it easy for the Board and convenient for the public. In a word, it is necessary, to enable us to organize a department which shall be adequate to the work in hand, to have, in addition to the various items already specified, a further sum of not less than \$2,000 yearly for the salary of a superintendent, office-rent, and clerk hire. Summing up, we find ourselves confronted with a total which cannot but be regarded as a very serious amount. But, however it may be looked at by the town, we cannot see any deduction which can be made from \$44,000 which would not gravely impair the efficacy of a thorough and comprehensive system of highway reform. Of course, we must not be understood to argue that the town must needs spend so much each year in case it buys first-rate

machinery, or tries to improve its roads. We only wish to record our opinion as public officers that it would not be possible to make the most profitable use of the former, or secure the most satisfactory results with the latter, without something near that expenditure for this year. To be sure, we shall not require new machinery each year; and after a few years of such activity, we should have placed all our more important ways in a condition to dispense with much heavy construction, and a less sum would suffice for the work of re-surfacing and general maintenance, which would then be all that would be required. At the same time, it is well to bear in mind that Quincy is rapidly growing and demanding new streets, and almost as rapidly outgrowing its old ones. Hardly a month passes without a petition to relocate, widen, and straighten some antiquated, crooked lane, which modern notions must needs transform into a stately avenue. On the whole, it is not wise to flatter ourselves that we can ever reduce in large measure the amount of our current expenditure graduated upon an adequate scale of systematic and thorough highway management. The examples of almost all the cities of the State may serve to point and emphasize this warning.

Turning now from forecast to history, we present the record of the year's doings. And here, apart from the usual scattered jobs of ordinary repair or partial reconstruction or improvement, we wish to direct more particular attention to the tentative efforts of the Board to throw some light upon what seems to be the point of real importance awaiting the decision of the town. We have taken about half a mile of Hancock Street, and turned it into what we think should be taken as a standard first-class road for this town. We have rebuilt and enlarged in the process an old culvert, and a long and lofty stretch of retaining wall. We have widened the roadway over the brook, reduced and improved its grades, replaced its curbing, and rebuilt its sidewalks and fences where disturbed by the improvements. We have supplied adequate drainage, and regraded and re-surfaced connecting ways. In short, we have completed it essentially as we think that kind of way ought to be constructed and maintained if we mean to attempt a thorough, regular, and business-like management of our highways. We accordingly offer that as a sample for inspection.

The total cost of this job, including heavy repair of the part of Adams Street parallel to Hancock Street, which was torn to pieces by the heavy travel diverted over it by the closing of the latter way, was almost \$13,000, or about half of the entire appropriation for the year. Of this amount somewhat less than

\$5,000 was spent upon the viaduct over the brook. The actual cost of such a way, then, when finished forty feet wide from curb to curb, we cannot place at less than from \$15,000 to \$20,000 per mile according to circumstances of grade, convenience of material, and so forth. The comparative specimen of a middle paved band with broken-stone sides, which was designed for the northern extremity of the same great thoroughfare, we felt obliged to postpone for the present, for prudential reasons. It seemed probable before mid-year that our resources would be unequal to both undertakings. This foreboding was amply justified later on, as will be noticed in the Auditors' report. Several of the special appropriations which were assigned to our charge by the annual meeting, were unavoidably cut off by the pressure of other matters, and the sudden close of the working season. We must again refer to the Selectmen's report for the details of the financial operations of the Board.

In general, it will be observed that we have endeavored to get along with as little desultory and disconnected construction as possible, and, except where it could be readily dove-tailed into permanent and systematic operation, we have confined ourselves to necessary repair. Take the Neponset bridge, for instance: We have spent only about \$300 upon it, when ten times that sum would not put it in fair condition. And we justify the parsimony exhibited in this case, by a principle of action which applies with equal force to the entire thoroughfare of which it forms a part, as well as to some other highways in this town. It is all worn out, bridge and road alike. It must be rebuilt from top to bottom very soon indeed. Consequently extensive repair is a pure waste of money. Until we are ready to tear out the whole structure, and replace it with a new and better one, it is foolish to do more than patch and brace and temporize. All half-measures in such cases are improvident. We have a recent example of this well-meant but extravagant frugality in the restoration, two years ago, of Washington Street from Edwards Hill to the Point. It was costly, and it was as good, no doubt, as the tools at our disposal could make it; but it was not good enough nor costly enough to be truly economical. It is already much worn and distorted, and must presently be replaced with a more solid surface upon a heavier foundation. And so it is with the decrepit old bridge; and yet, scrimp as we may, there is no way of avoiding replanking it in 1887, except pulling it down and rebuilding, which the town has not as yet manifested a willingness to undertake. We must, therefore, ask for this purpose at least \$2,000 for the coming year.

Let us then briefly recapitulate our conclusions : —

If the town, upon full consideration, holds steadfast in its intent of re-organization, and is prepared to face the consequences, then we ought to be authorized to spend —

For a twenty-ton steam-roller . . .	\$7,000 00
For water-cart and rotary screen . .	1,000 00
To build one mile of first-class way . .	15,000 00
To build one mile of second-class way . .	5,000 00
To build three miles of third-class way . .	3,000 00
For general superficial care and maintenance	9,000 00
For superintendent and office expenses . .	2,000 00
For quarry and gravel pits	2,000 00
Total	<u>\$41,000 00</u>

If the town, however, staggered by this exhibit, feels obliged to put up with less thorough-going work, or is content to go more slowly, as for example, by using its machinery less and to less advantage, but also less expensively, why, then the construction account can be proportionately reduced. Or, finally, if the town should decide to try to get on a while longer without first-rate tools or improved roads, then an appropriation of ten or fifteen thousand dollars for absolutely necessary ordinary repair would answer all useful purposes.

The expense for street-lighting for the year up to Feb. 1 was about \$3,500, and this expenditure for the entire year will probably cover the appropriation. The amount set apart for this service should be increased for the coming year, for two reasons. First, because in a few cases we have encouraged people to place posts at favorable points, on the assurance that we would urge the town to provide for them. And, secondly, because a large number of the established wooden posts have rotted, and will require to be replaced with iron immediately. We should not advise the town to accept in future any lamps upon wooden posts. We should recommend an appropriation of \$5,000 for this purpose, including care and lighting.

In conclusion, the subscribers wish to define distinctly the position which they assume at this time. They cordially concur in the recommendation to set up a far more thoroughly organized and equipped department for highway management than the town has ever had. They do most emphatically believe that it is economical, if you attempt an enterprise at all, to employ the best of tools, and put up with nothing short of the best workmanship which is appropriate to the wear it is expected to resist.

Poor work is always dear, and the best is generally cheapest. Still they have no defined policy to urge until they know how much money the town is willing, or can afford, to spend in the undertaking. They disclaim any intention at present of either urging or discouraging any particular line of action by the town. Thus far they have been content to gather some information, which is submitted without argument. It is for the town on full consideration of all the circumstances to decide what it can do, and what it will do. It is, after all, largely a question of finance. It is enough for us to point out as nearly as we can just what can be done, how it can be done best, and what in our judgment it would cost to do it in the most economical manner. After that it is our business to do the best we can with whatever allowance the town may think judicious and prudent to assign us.

J. Q. ADAMS.
JOHN CASHMAN.
GORDON McKENZIE.

FEB. 10, 1887.

REPORT OF MANAGERS OF ADAMS ACADEMY.

THE Managers of the Adams Academy have been induced by the facts and figures furnished them by the master in his report, and in a table of statistics which he has drawn up at their request, to consider very seriously whether the time is not drawing near when a somewhat altered policy would be expedient for the school in the interest of the town, and with a view to the greater usefulness of the endowment of the founder.

The figures which may be found annexed to this report seem to show that the tendency of the school of late years has been steadily in the direction of supplying a local rather than a general demand. It has become gradually more and more a day school, and less and less a boarding-school. It has at the same time dwindled in numbers, the falling-off being almost wholly from the distant attendance. For example: of a total of 69 pupils in 1879, 39, or 56 per cent, were day scholars, whereas in 1886, of a total of 39, 27, or 70 per cent, were day scholars. While of Quincy boys there were 14 in 1880, or 27 per cent of the whole school, in 1886 there were 24, or 61 per cent of the entire attendance. It is further to be noted, that, while there were presented for admission to the higher seminaries in 1878 fourteen candidates, the number in 1886 had fallen to six. Various causes may be assigned for the tendency here disclosed, but it may be sufficient for us to amplify and discuss one only, which will of itself, if accepted, sufficiently justify the change of policy which we feel bound to suggest to the town. Dr. Everett, in his report of last year, commented with earnestness and justice upon the heavy handicap under which the institute struggled in the shape of its boarding-house. The situation of this building, apart from all other considerations, would be sufficient to condemn it for this purpose; but bad as that is, it is not its worst feature. It lacks almost all the attributes of attractiveness and convenience which are becoming yearly more and more expected and required. The master's presentation of the difficulties of his position led us to study the situation which we must occupy in competition with other institutions working in the same field. A very little examination forced us to the conclusion that it was hopeless for us to meet the demands of parents for more and more attractive and salubrious physical surroundings for their sons if they desired to send them from

home to live, without a radical reconstruction of our present appliances, and a very large expenditure of money. We are satisfied that if we propose to strive earnestly for a share of the patronage to which Southborough, Andover, Exeter, or Groton cater, we must have lands and houses and class-rooms and dormitories and play-grounds on a scale entirely disproportioned to any resources at our disposal. It might be possible to find fifty acres of land near to the village, yet remote from noise and crowds; but where should we find the one hundred and fifty thousand dollars which we should have to pay for it, and for the buildings and accessories which would be necessary to equip a really first-rate public boarding-school? The income from the endowment, to be sure, is now handsome, and will some day be magnificent; but the principal cannot be touched, and it would take years of accumulation to furnish the required sum, while meanwhile the school must stop.

Nor is it by any means clear to us, that, after all our expenditure, we should be working in the right direction. It seems to us probable indeed that the true demand which we could most wisely try to meet, the duty which lies nearest to our hand, may after all be of a different kind.

Our statistics tend to show that there is a steady and increasing call for the service of an advanced school here corresponding to the High and Latin schools of Boston or Cambridge, or the Roxbury Latin school. They may be interpreted to signify that there is what may be called a local constituency tributary to this spot, which is likely to grow fast enough to tax to the utmost the capacity of our staff of teachers and the income from our fund.

The following passage from Mr. Everett's report is full of suggestion as to the possibility of usefulness in this direction:—

“The boy who entered on the preparatory footing a year ago was duly promoted into the regular school in September. He has however had a successor, and I have every reason to believe that with the exercise of reasonable care the class may be made a most interesting and profitable part of the school. There are many young boys in Quincy, whom their parents, while finding no fault with the other private or with the public schools, would prefer to have in a smaller institution, and under male teachers exclusively. Not a few of these, and of older boys, now go daily into Boston. I must regret this fashion, not only for the sake of the Academy, but of the public schools. It is impossible for either public or private schools, in the neighborhood of a large city, to satisfy the expectations of its inhabitants, if a number of the wealthiest and most influential citizens habitually send their children to the city for training.”

Probably such a change of direction or aspiration would entail certain modifications of treatment, and require a good deal of re-arrangement of detail and perhaps even important alteration in methods; but these things could be safely left to the care of competent officers and the slow hand of time. That this may be safely and wisely done, a further extract from the annual report of the master of the school may serve to show:—

“Another experiment which we are trying has arisen from the increasing favor in which the Institute of Technology is held. I have had very interesting and satisfactory talks with President Walker and Professor Atkinson. In consequence, without a violent or wholesale abandonment of an established course, some modifications have been made for two of our pupils in the second class, whereby we hope at the end of this year, if they remain in the same mind, to secure their admission to the Institute; while at the same time, should their views change, they will not be out of the line of preparation for other courses.”

The cardinal point for us to consider, however, is that such a change would enable us to dispense with the whole paraphernalia of boarding-house and paternal supervision. If any parent should be attracted here from a distance to place his son, he would provide himself for his board and lodging; the school would no longer undertake this function.

The town would thus be relieved of the most serious infelicity of our present condition. We are to-day indebted solely to the liberality and energy of Dr. Everett for such accommodation for our visiting pupils as they have. The town ought not to ask or accept such a sacrifice. We doubt if any other master could or would undertake the care and expense, and we know that this Board would absolutely decline to assume it.

Under these circumstances we have deemed it our duty to survey the whole ground about us to try to discover the way towards which it would seem wisest for the town to turn.

And when the facts of our situation are grouped together, we seem to have discovered a trace which it may be worth while to follow up.

In a short time the Woodward bequest for an Academy exclusively for girls will be put in operation, and will or might supply all the needs of the town for such education as has heretofore been furnished by the Town High School. If this could be secured, and the Adams Academy so modified as to cover the entire space between the ordinary common-school course and the requirements of the great institutions of advanced instruction, why would it not be possible, in case a common understanding and co-operation could be obtained

between the trustees of these foundations and the town, to secure from the Legislature permission to discontinue our High School, making both the substitutes absolutely free schools? Undoubtedly their own endowments by that time would insure the town from any outlay on their account. But even if some slight contribution should be required for a short time, it would be more than offset by releasing the present lot and building of the High School for general school purposes. Possibly in that event the government of the Adams Academy might be relegated to the regular school authorities. Such a proceeding as we have thus outlined would also seem to be a movement upon the lines of a closer connection and inter-dependence between the common schools and the higher institutes of learning, which the more advanced thinkers upon education seem to favor.

But whether such a scheme in its integrity be feasible, or whether it may be deemed inexpedient or impracticable upon legal or other grounds, we must still insist upon the expediency and the necessity of some modification of the policy which has been thus far pursued by the Academy. We think that it should be transformed as soon as it can be done conveniently into a day school, the boarding-house discontinued, and some modification made in its curriculum to adapt it less exclusively to the single end of preparing boys for colleges.

In conclusion, we may be pardoned if we repeat that it is no part of our purpose at present to propound a complete plan or to urge any radical or abrupt resolve. We have merely felt it our duty to lay before the town the facts as we find them, and to offer such suggestions as have occurred to us thereon. If upon mature consideration any corporate action should seem to be required, the town can readily commit the whole subject to suitable representatives of the various interests concerned, who could ascertain whether any general re-organization of these various educational foundations is expedient, and, if so, attainable.

The past year has been marked by no very especial deviation from the regular course of proceedings at the Academy. The size of the school, which has been steadily shrinking for ten years, is a trifle less even than last, when we had hoped to have touched bottom. But as the loss is but one pupil, we are encouraged to believe that we have almost reached the lowest point in our decline.

	Total Number of Pupils in Adams Academy.	Total Day Scholars and per cent of whole.	Total Quincy Boys and per cent of whole.	Total offered for any College.	Total admitted to any College.

REPORT OF TRUSTEES OF THOMAS CRANE PUBLIC LIBRARY.

THE Trustees of the Thomas Crane Library herewith submit their seventh annual report, being the sixteenth report of the whole series since the Library was founded.

The number of books borrowed during the year just closed is 61,931, being the largest number taken out in any year thus far. The names on the Librarian's register have been increased by 563 new ones, the total number being 7,645.

The division of the reading-matter is as follows:—

	Public.	School.	Total.	Per Cent.
Fiction	24,828	237	25,065	40.4
Juvenile Fiction	12,863	1,782	14,645	23.6
Periodicals	8,596	82	8,678	14.0
History	2,309	1,283	3,592	5.8
Travels	1,658	1,024	2,682	4.3
General Literature	1,853	234	2,087	3.3
Biography	1,404	447	1,851	2.9
Arts and Sciences	1,440	242	1,682	2.7
Poetry	992	211	1,203	1.9
Religion	293	2	295	0.4
Educational	147	4	151	0.2
Totals	56,383	5,548	61,931	—

During the year 586 volumes of new literature have been added to the Library by purchase. One hundred and ninety have been presented to it. Of the books heretofore in the Library, 501 volumes have been replaced, the original copies having been worn out to such a degree as to be unfit for further use. There have been 453 volumes rebound. The number of pamphlets added to the Library was 50, all from private sources.

During the year 5,548 volumes were taken from the Library by the teachers, and circulated in the schools, directly aiding in the school-work.

During 1886 the Library was open 305½ days.

The full catalogue of the Library was prepared and published in 1875. Since then two supplements have been printed,—the first of 56 pages in 1879, at a cost of \$291; the second of 85

pages in 1883, at a cost of \$431.04. In both cases, the expense of preparation and printing was met out of the accumulations of the Catalogue Fund, the town not being called upon to make any special appropriation on that account. During the four years which have elapsed since the preparation of the last supplement, some 1,800 volumes have been added to the Library. These are now only accessible through the card catalogue. It is proposed, during the current year, to print an additional, or third, supplement, of the same character as the two previous ones. The cost of printing this will be met out of the accumulation of the Catalogue Fund. No especial appropriation, therefore, will be needed for this purpose.

The Trustees would respectfully ask for the same appropriation as that of last year, namely, \$2,700.

Mr. Barker's report as Treasurer is herewith appended.

HENRY BARKER, *Treasurer.*

REPORT OF BOARD OF HEALTH.

THE Board of Health organized March 19. Rules and regulations were adopted, and published, as required by law, in the *Quincy Patriot*. Francis A. Spear was appointed inspector, and Terrance Keenan and Peter McConarty, scavengers. Meetings of the Board were held almost every week during the summer and autumn seasons.

Early in the year, F. A. Read resigned his position as member of the Board. At a joint convention of the remaining members and the Selectmen, W. L. Faxon was unanimously elected to fill the vacancy.

Twenty-five hundred inspections were made during the year. Compared with the inspection of last year, a marked improvement was apparent in the general sanitary condition of the town. Yards and cellars were more free from filth and rubbish, and privies and cesspools were more cleanly maintained.

Five hundred and twenty-four nuisances were discovered, and more than four hundred of them were abated. These nuisances consisted principally of uncleaned or imperfectly constructed privy-vaults and cesspools, and their dangerous proximity to wells and houses.

A very general and a most dangerous nuisance is the untrapped, unventilated sink-drain, by means of which the gases from the cesspools are conducted directly into the houses. Several hundreds of these deadly contrivances were discovered in the inspection of last year. A few only have been remedied. The ordinary shallow trap that forms part of almost all kitchen sinks is wholly inadequate to prevent the passage of gases into the houses in these cases.

The privy is the most common and the most objectionable nuisance in the town. Of the two thousand inspected, but very few were found properly constructed. The vaults, in the very large majority of cases, consisted of simple holes in the ground, or were made of wood or loose stones, allowing their liquid and liquefying contents to leach into the soil, contaminating the air and earth, and very frequently the wells, with their poisonous products. All privy-vaults and cesspools should be of ample size, constructed of substantial masonry, and cemented so as to be water-tight.

Much discomfort arises from the disagreeable stench that

are produced in cleaning out cesspools and privy-vaults by the hogshead-and-dipper method employed by the scavengers. It is hoped that in the near future this work may be done by the odorless excavating apparatus now so generally used for this purpose. The great hinderance to the use of this apparatus in Quincy, is the condition of the privy-vaults, the contents of which become too solid to be cleaned out in this way on account of the liquids being allowed to leach into the ground.

It is believed by your Board that a by-law should be made, forbidding the maintaining of piggeries in the town. The of-fal on which the pigs are most commonly fed is almost always in a state of putrefaction, filling the air in the neighborhood of the piggeries with poisonous and disagreeable stench. The town is now so thickly populated that there is no place so secluded that a piggery can be maintained without becoming a dangerous nuisance to the inhabitants. It was conclusively shown by a commission appointed by the English Parliament, that the flies that swarm about these places in summer are a common means of spreading scarlet-fever among the children of communities in which piggeries exist.

The necessity for a system of sewerage is very apparent. Not only is it needed in the centre of the town, where the absence of drainage facilities hinders proper improvement of real estate, and where the removing of sewage is expensive and offensive, but it is needed in the locality extending through the whole of Water and Copeland streets where the ground is now filled with filthy deposits, which the nature of the soil prevents from speedy decomposition, and where for several months of the year the surface-water is with difficulty gotten rid of. Many portions of Wollaston imperatively demand the construction of a sewer. This locality has an impervious clay bottom, which prevents the leaching-away of sewage and night-soil, which now fills the shallow layer of loam to a dangerous extent. And besides all this, through the facilities rendered by the Water Company, more than four hundred thousand gallons of water a day are poured into the soil, principally in the centre of the town and in Wollaston, which must soon increase the amount of ground-water to a point of great danger.

Your Board is of the opinion that Town Brook, from a point south of Water Street to Washington Street, should be thoroughly cleaned out. The bottom of the brook is now filled with rubbish of many kinds, and vegetation, which obstruct the flow of water in the dry summer-months, allowing it to accumulate in stagnant pools filled with the poisonous products of their decomposing contents. Near Water Street, and opposite the site of

the John Hancock School, there is an accumulation of sediment from the street-washings and the polishing-shops above, which causes the brook to overflow its walls in that neighborhood. By clearing away these obstructions, and thus lowering the brook, the land above Water Street, which is now coming into use, would be much increased in value, and the additional taxes resulting would probably more than offset the expense of cleaning out the brook.

Two hundred and forty-eight deaths occurred in the town during the past year, equal to about nineteen in a thousand of the population. Of these deaths, forty-five, or eighteen per cent, were from consumption; twenty-three from pneumonia; twenty-three from croup and diphtheria; thirteen from cholera infantum; two from scarlet-fever; and one each from dysentery and typhoid-fever.

In compliance with the Public Statutes, requiring householders and physicians to report to the Board of Health all cases of contagious diseases occurring within the town, fifty-five cases of diphtheria and croup, forty-four cases of scarlet-fever, nineteen cases of typhoid-fever, and one case of measles, were reported. The principals of the public schools were immediately notified of the contagious cases, who took the proper precautions to prevent the spread of the diseases among the school-children. It is hoped during the ensuing year, that measures can be taken to have the disinfection and fumigation that is necessary in the management of all cases of contagious diseases, carried out, under the supervision of the Inspector of the Board. This will involve an outlay of about one hundred and fifty dollars.

In compliance with the Public Statutes relating to vaccination, forty-three children belonging to the public schools were vaccinated, at an expense to the town of eight dollars and fifty cents.

At its annual meeting, the town appropriated the sum of five hundred dollars for the use of the Board. Its expenditures during the year are as follows:—

Printing	\$80 00
Inspecting	352 00
Legal services	57 00
Vaccine virus	8 50
	\$497 50

In order to obtain more convenient accommodations than those secured in its present place of meeting, which is often oc-

cupied by the several committees and town officers, to the exclusion of the Board of Health, an arrangement is made with the School Committee, to use during the ensuing year the rooms engaged by them in the new Durgin & Merrill block, at a cost of seventy-five dollars. It is hoped that the town will appropriate this sum for that purpose.

The following appropriations are recommended for the ensuing year : —

Printing	.	.	.	.	.	.	.	\$100 00
Inspecting	.	.	.	.	.	.	.	350 00
Disinfecting	.	.	.	.	.	.	.	150 00
Incidental expenses, including legal services,								100 00
Rent of room	.	.	.	.	.	.	.	75 00
								\$775 00

The additional sum asked for printing, is intended to be used in the printing and distribution of circulars, relating to the isolation and management of disinfection, in cases of contagious disease.

The appropriation for carrying out measures of effectual disinfection and fumigation, is earnestly recommended, as it is fully believed that these processes are not now conducted by house-holders with sufficient care.

Your Board has been conscientious and earnest in its attempts to improve the sanitary condition of the town, and to limit and diminish the amount of disease and death, and it feels assured that some good will result from its efforts.

SAMUEL M. DONOVAN.

REPORT OF PARK COMMISSIONERS.

THE organization of the Board remains as last year, Mr. George Cahill having been re-elected for a new term of three years.

At Wollaston Park your Commissioners have cleared out the underbrush and cut out the dead wood, also replaced the old rail-fence on Hancock Street by a new post and wire fence, which, with the row of trees that has been set out on the street line by the Quincy Improvement Society, adds much to the attractiveness of the locality. Whenever the street grade is established from the hollow opposite Mr. Butler's house to the park line, an attractive and convenient entrance for pedestrians and carriages should be built. This can be done with a small expenditure, and your Commissioners would have undertaken it this year, with the amount returned to the Town Treasurer (see report), had there not been so much uncertainty about the grade of the street. We are, however, still of the opinion that before any considerable change or improvement is undertaken, the services of a competent landscape architect should be secured to make complete plans, to be carried out in years to come, as the town shall see fit to appropriate money therefor.

At Faxon Park your Commissioners have done little except to petition the Road Commissioners to lay out a street from Franklin Street to the park, to comply with the conditions on which the town accepted the gift. (See report of last year.) The owners offer to give the land, provided the street is laid out and built satisfactorily to them. We understand the Road Commissioners have laid out the street, and caused suitable plans to be made, and will insert an article in the town warrant to see if it will accept the same.

An examination of the financial report, herewith appended, will show the amounts that have been received from sales of grass, pasturage, etc., as well as an itemized account of expenditures. To continue the work of clearing up and caring for the parks, your Commissioners ask the town to appropriate for the next year the sum of \$500, together with the amount \$210.74 of last year's appropriations returned to the town treasury.

CHIEF ENGINEER'S REPORT.

ENGINEER'S OFFICE, QUINCY, Feb. 1, 1887.

TO THE HONORABLE BOARD OF SELECTMEN:—

Gentlemen,—In accordance with the usual custom which was inaugurated by my predecessor, Chief William Curtis, in 1862, I herewith submit the twenty-fifth annual report of the Quincy Fire Department, together with such other information as may be of interest.

The department as at present organized is under the control of a Chief, and six Assistant Engineers; viz.,—

JOHN W. HALL, <i>Chief</i> ,	AMOS L. LITCHFIELD,
WILLIAM B. BARRY,	BENJAMIN KING,
FRANKLIN CURTIS,	PETER WILLIAMS.
JOHN A. DUGGAN, <i>Clerk</i> ,	

FORCE OF THE DEPARTMENT.

In addition to three horses, the manual force of the department consists of sixty-eight, as follows:—One driver (E. Frank Mitchell), one engineer of steamer (Joshua Brown), and sixty-six call-men, as shown by the following rolls: twelve men each on Steamer Quincy No. 1 and Hose 1 combined, J. W. Hall Hook and Ladder Truck, and J. Q. Adams Chemical No. 2; also ten men each on Hose Companies 2, 3 and 4.

Steamer and Hose Company No. 1.

Thomas H. Conlon, *Foreman*. James C. Elcock, *Assistant*. John F. Conlon, *Clerk*. *Hosemen*, Frank C. Packard, Robert J. Downing, Nicholas Garbarino, Andrew F. Conner, Patrick S. Morris, John McGrath, Farrell Kane, John Mahoney, F. W. Smith.

J. W. Hall Hook and Ladder Company.

Arthur C. Merritt, *Foreman*. Luther Rogers, *Assistant*. Frank L. Carlton, *Clerk*. Gridley B. Totman, *Steward*. E. M. Litchfield, Frank E. Rogers, A. P. Wentworth, William Albert, Welcome J. Blake, John H. Newcomb, Fred. Young, Herbert Whitcomb.

J. Q. Adams Chemical Company No. 2.

Nathan G. Glover, *Foreman*. J. F. Reardon, *Assistant*. G. E. May, *Clerk*. Dennis McCarthy, *Steward*. James F. Duggan, Alfred G. Nye, Cornelius Lyons, Frederick G. Bryant, James F. Clifford, Thomas Costain, Patrick H. Farrell, William O'Brien.

Hose Company No. 2.

Albert G. Olney, *Foreman*. J. P. Thomas, *Assistant*. Gilbert H. Rhodes, *Clerk*. James P. Edgerton, *Steward*. M. R. Sparrow, Samuel McKay, George E. Thomas, Frank L. Merrill, J. W. Newcomb, John F. Grant.

Hose Company No. 3.

William F. Powers, *Foreman*. Jeremiah Lyons, *First Assistant*. Bernard Donaher, *Second Assistant*. James A. White, *Clerk*. John Barry, *Steward*. James M. Usher, Dennis Buckley, William P. Moodie, George O'Brien, John F. O'Brien.

Hose Company No. 4.

Frank E. Burrell, *Foreman*. Frederick E. Alden, *First Assistant*. Rollin H. Newcomb, *Second Assistant*. Frank G. Mead, *Clerk*. William Caldwell, *Steward*. Walter B. Burrell, Isaac P. Bent, Alfred L. Mead, Luther M. Hersey, J. E. Glover.

ROLLING STOCK OF THE DEPARTMENT.

The rolling stock at present in service consists of one steamer, one hook and ladder truck, three hose-wagons, one four-wheeled hose-carriage, two hose-jumpers, and one hose-pung.

HOSE.

The department has upon its wagons, reels, and in reserve, 5,700 feet of hose, 500 feet of which is not reliable, and requires 1,000 feet of new.

We also require runners for our hose-carriages, and also harnesses for the hook and ladder truck, and hose-wagons 2, 3 and 4. Some action should be taken to provide horses for the hook and ladder truck. The hook and ladder truck and hose-wagon 1 should be varnished, as a matter of economy.

The chemical engine house, formerly at Wollaston, was removed to Hough's Neck during the past season, and located

upon land of Mr. Edward Whicher, on Sea Street, Mr. Whicher having generously donated the free use of the same for the purpose. The house and apparatus was at once placed, and still remains, in charge of a competent steward, Mr. Walter D. Littlefield.

Number of hydrants at present located, 89.

In accordance with the requirements of Section IV. of the Town By-laws, I have the honor to report that the Board of Engineers respectfully recommend an appropriation for the ensuing year, of \$5,300.

By vote of the Board of Engineers, I am instructed to recommend in this report, and also to cause the following article to be inserted in the warrant for the annual meeting: viz., — ART. — To see if the town will construct reservoirs, or cause hydrants, for fire purposes, to be placed at the following points in West Quincy: *First*, Grove Street, near private way leading to granite railway; *Second*, Bates Avenue, opposite house of Timothy Reiordan; *Third*, Robertson Street, near house of S. N. Moloney; *Fourth*, West Street, on or near premises owned by Galloway estate.

Complaints are made by the Board of Health, against the stable at the steamer-house, and some appropriation should be made to meet the demands of said board.

The Auditors, as in duty bound, will undoubtedly censure the Engineers for an excess of appropriation; but quite a sum, \$315, charged to us, should have been paid previous to Feb. 1 of last year, and not have been allowed to lay over, as I learn the bills were presented in season, but payment was not demanded.

I again congratulate our citizens upon the fact, that we have been comparatively free from large fires during the past year, and assure them, that with the amount of new hose asked for, we are as well equipped as any department in a town of our size in the State.

Accompanying this report is a list of fires and alarms which have occurred in town, for the past year, for which I am indebted to John A. Duggan, the efficient clerk of the Board of Engineers.

My thanks are due your Honorable Board for the courtesy shown on all occasions; also to my associates on the Board of Engineers; and last, but not least, to the rank and file of the several companies, for the prompt and able manner in which they have responded when called upon.

Respectfully submitted,

JOHN W. HALL,

Chief Engineer, Q. F. D.

LIST OF FIRES AND ALARMS FOR THE YEAR
ENDING FEB. 1, 1887.

- March 22. 4.12 P.M. Box 51. Dwelling-house on Hancock Street, owned by Edmund F. Taylor. Cause, defective flue. Steamer, Hook and Ladder, Hose 1 and 2, and Chemical 2 responded.
- April 9. 2.26 P.M. Box 46. Barn owned by Lewis Dell. Loss, slight.
- April 10. 3 P.M. Still alarm. Wood on Willard Street. Owner unknown. Loss, trifling. No insurance. Hose 3 responded.
- April 18. 12.10 A.M. Box 26. Store of Rogers Bros., Temple Street. Owner, J. Q. Adams. Cause, unknown. Loss, \$302. Fully insured. Steamer, Hook and Ladder, and Hose 1 responded.
- May 21. 4.20 P.M. Box 48. House and stable of Edward J. Eaton, at East Milton. Cause, carelessness of child. Steamer, Hook and Ladder, and Hose 1 responded.
- June 12. 11.40 A.M. Box 42. Dwelling-house on Copeland Street, owned by R. Fitzgerald. Cause, defective flue. Loss, trifling. Steamer, Hook and Ladder, Hose 1 and 3, responded.
- June 21. 5.05 P.M. Box 42. Dwelling-house, Copeland Street, owned by John Evans. Cause, children and matches. Loss, \$40. Steamer, Hook and Ladder, and Hose 1 and 3 responded.
- June 27. 12.50 A.M. Box 62. Wood-pile near Atlantic and Hancock streets, owned by Thomas Brady. Incendiary. Loss, trifling. Chemical 2, Steamer, Hook and Ladder, and Hose 1 responded.
- June 30. 4.10 P.M. Box 26. Railroad bridge, Adams Street. Cause, sparks from locomotive. Loss, trifling. Steamer, Hook and Ladder, and Hose 1 responded.
- July 6. Still alarm in A.M. Grass, rear of dwelling-house of the late Daniel Baxter, School Street, owned by his heirs. Cause, sparks from a locomotive. Loss, trifling. Hose 1 responded.

- July 8. 11.16 A.M. Box 46. Dwelling-house on Willard Street, owned by Edward McDevitt. Loss, \$40. Insurance, \$1,400. Cause, accidental. Steamer, Hose 1 and 3, responded.
- July 19. 2.15 P.M. Box 56. Dwelling-house corner Beale Street and Highland Avenue, owned by J. T. Burchstead. Cause, unknown. Loss, \$535. Insurance, \$3,000. Steamer, Chemical 2, Hook and Ladder, and Hose 1 and 2 responded.
- August 22. 11.50 P. M. Box 46. Boarding-house of Eliakim Byard, Cross Street. Loss, \$600. Insurance, \$3,900. Steamer, Hose 1 and 3, responded.
- September 21. 3.20 P.M. Box 72. Dwelling-house on North Street, owned by Mrs. Prince W. Kenny. Cause, defective flue. Loss, \$350. Insurance, \$350. Steamer, Hose 1 and 4, responded.
- October 15. 7.15 A.M. Engine-house of S. N. Moloney, off Quarry Street. Loss, \$150. Insured.
- October 16. 1.55 P.M. Box 56. Woods and brush at Wolleston. Steamer, Chemical 2, and Hose 1 and 2 responded.
- October 17. 1.45 A.M. No alarm rung. Hay-shed on Farrington Street, owned by Henry Brooks. Cause, incendiary. Loss, \$50. Insured, \$200. Hose 2 responded.
- October 17. 3 A.M. Woods and brush, Bellevue Swamp. Chemical 2 responded.
- December 14. 8.30 P.M. Box 41. Engine-house and polishing-shop of Field & Wild, on Gass Place. Steamer and Hose 1 responded. Loss, \$2,750. Fully insured.
- December 19. 4.45 P.M. Box 23. Currier-shop of William Panton, on Hancock Street. Loss, \$2,232. Insurance, \$3,600. Cause, accidental. Steamer, Hook and Ladder, Hose 1, 2, and 4, responded. Second alarm sounded.
- December 27. Still alarm. 12.30 P.M. New dwelling-house on Quincy Street, owned by D. & F. Flowers. Cause, defective flue. Loss, \$15. Hose 1 responded.
- December 30. 11.50 A.M. Box 46. Dwelling-house of Timothy White, on Larry Place. Cause, defective flue.

1887. January 8. Still alarm. 8 A.M. Dwelling-house of F. F. Green, Hancock Street. Loss, trifling. Fully insured. Cause, accidental.

January 26. Still alarm. Sheds of Thomas Magee, Chubbuck Street. Loss, \$75. Insured.

16 box alarms and 8 still; total, 24 alarms.

REPORT OF COMMITTEE ON SEWERAGE.

THE Committee of the town to whom was referred the report of the Selectmen upon the matter of town sewerage, with directions "to consider the necessity of additional legislation, secure the same, if deemed advisable, and report to the next annual meeting," find upon a careful examination of the statute as it now stands, and the decisions of the courts in cases arising under it, that there are two distinct methods by which a town can secure necessary sewerage. The first is by action of the Road Commissioners, where such a board exists, proceeding however, in this case, not as agents of the town, but as public officers, deriving their power from the sovereign authority, and grounding their action upon the necessity of the case for the convenience and health of the community. The persons deriving benefit therefrom by draining their land or houses, shall pay a proportional part of the cost of building and maintaining the same, to be ascertained by the same board which lays out and builds the sewers.

The other and more recent plan is provided by the seventh section of the statute, and permits the voters of a town to adopt a system of sewerage, and assess the cost upon real estate within the territory by a "fixed, uniform rate based upon the estimated average cost of all the sewers therein, according to the frontage of such estates on any street or way where a sewer is constructed, or according to the area of such estates within a fixed depth from such street or way, or according to both such frontage and area." This latter arrangement contemplates direct and original action by the body of the town, adopting an entire concrete scheme adapted to the whole or a part of the town by vote in town-meeting. But the characteristic difference between the earlier and the later methods seems to lie more essentially in the method prescribed for adjusting the cost of the improvement to the real estate benefited by it, than in the efficacy of their constructive operation. In the first, it seems to be left to the Road Commissioners to decide what proportion of betterment ought fairly to be charged, not only to persons entering their private drains into the public sewer, but also to any land-owner who by "more remote means" receives value from the construction. The assessing board, in other words, seems to be free to range over all the circumstances and

incidents applicable to each individual land-owner, and upon a fair consideration of all the facts bearing upon each case to fix the share of the burden which each should bear in case he be found to have actually derived a benefit to his estate from the outlay incurred. The second mode of ascertaining the exact proportional share of liability which shall attach to each separate parcel of real estate seems to aim at a more rigid and restricted rule of assessment. It appears to wish to limit the field of view and the range of discretion of the board of assessors. They must confine themselves in the first place to a fixed, uniform rate. Secondly, that rate must be applied according either to the frontage of lots on sewered streets, or to their area within a fixed depth from the street. Or, finally, both frontage and area upon such streets may be taken as a basis of appraisal, but nothing else. It would seem, therefore, that the town has practically its choice between two courses, either one of which would appear to be amply adequate to secure the end in view. The alternative adopted would be decided by the relative favor with which the town might regard the different schemes of payment provided.

Upon this statement of the law, your Committee were of opinion that it did not appear necessary to secure further legislation, unless the town should think that a more independent and impartial board than the Road Commissioners might be desirable to adjust the burden of taxation incident to the work. An independent commission to be appointed by some court or other high authority from persons entirely outside of local influence, suggested itself as a possible contingency. But on further reflection, the matter seemed to be hardly of sufficient importance to incur a great expense and introduce such ponderous machinery. Perhaps, indeed, the local knowledge of a competent board of Road Commissioners might counterbalance any possible personal bias, fear, or favor which might affect a townsman. In any case, the fact that any man aggrieved by their judgment has a free appeal to the verdict of a jury, would seem to be a sufficient guaranty that no real injustice would be suffered by any one in any event. Your Committee, therefore, ask to be discharged from further service in this matter.

TOWN RECORDS

FOR

1886.

WARRANT FOR THE ANNUAL TOWN MEETING,

MARCH 1, 1886.

NORFOLK, SS. *To either of the Constables of the Town of Quincy, in said County,* GREETING:

In the name of the Commonwealth of Massachusetts, you are hereby required to notify and warn the inhabitants of the Town of Quincy, qualified to vote in town affairs, to meet at the Town Hall, in said Quincy, on Monday, March 1, 1886, at seven and one-half o'clock in the forenoon, to act on the following articles, namely:—

ARTICLE 1. To choose a Moderator.

ART. 2. To choose Town Officers.

ART. 3. To see how the town will vote on the following question: "Shall licenses be granted for the sale of intoxicating liquors in this town?"

ART. 4. To act upon the report of the Auditors of Accounts, Selectmen, School Committee, Trustees of Crane Public Library, Adams Academy, Managers of Mount Wollaston Cemetery, and Park Commissioners.

ART. 5. To determine the method of repairing the highways during the ensuing year.

ART. 6. To determine how the town land shall be improved during the ensuing year.

ART. 7. To revise the Jury list.

ART. 8. To see if the town will sell their land, or any part thereof, on Adams Street, known as the Newcomb lot, and authorize the Selectmen to execute a deed for the same.

ART. 9. To hear and act on the report of the Selectmen upon guide-boards.

ART. 10. To see if the town will appropriate the sum of two hundred dollars for repairing and decorating soldiers' graves, the

same to be expended under the direction of Post 88 of the Grand Army of the Republic.

ART. 11. To see if the town will grant the free use of the Town Hall for free lectures, and appropriate money therefor.

ART. 12. To see if the town will instruct the Selectmen to appoint Police Officers to enforce all laws bearing upon the sale of intoxicating liquors, and appropriate a thousand dollars therefor.

ART. 13. To see if the town will vote to change the name of Adams Park to Merry Mount Park.

ART. 14. To see if the town will proceed to fulfil the conditions required to secure Faxon Park for the free use of the town as a pleasure-ground, and appropriate money therefor.

ART. 15. To see if the town will instruct the Surveyors of Highways to place stone crossings at five or more commonly used crossings in the centre, and at such other parts of the town as seem necessary, and appropriate money therefor.

ART. 16. To see if the town will accept Section 9, Chapter 54, of the Public Statutes, allowing the planting of trees on public highways at public expense.

ART. 17. To see if the town will grade and maintain as an ornamental lot or space, the triangular piece of land, owned by the town, at the junction of School and Pleasant streets, and appropriate money therefor.

ART. 18. To see if the town will revise, alter, or amend in any way the By-laws of the Mount Wollaston Cemetery, and cause a new edition of said By-laws to be printed, and appropriate money therefor.

ART. 19. To see if the town will choose a committee of five to arrange with the Board of Managers of Mount Wollaston Cemetery and the Trustees of the Woodward Fund, for an extension of the Cemetery on the northerly side by taking a part of the large lot of vacant land belonging to said Woodward Fund, said committee to report in print in the town book, for the action of the town at the annual meeting in March, 1887.

ART. 20. To see what action the town will take towards providing a more suitable, central, and convenient location than the one that the engine-house recently built stands on now, in that portion of the town known as Atlantic.

ART. 21. To see if the town will purchase a lot of land in some central location, and move thereon the present house, or build a new one.

ART. 22. To see if the town will authorize the Selectmen to procure an assessors' map of the whole or any portion of the town, and appropriate money to defray the expense of the same.

ART. 23. To see if the town will provide some means of ventilating the cells of the Lock-up, and appropriate money therefor.

ART. 24. To see if the town will accept the provisions of Sections 64, 66, 67, and 68, Chapter 27, of the Public Statutes, and Section 1, Chapter 203, Acts of 1883.

ART. 25. To see if the town will accept the provisions of Sections 74, 75, 76, and 77, of Chapter 27 of the Public Statutes, and elect Road Commissioners.

ART. 26. To hear and act on the report of Committee on Roads.

ART. 27. To see if the town will sell the land and house on Canal Street, now occupied by the Hook and Ladder Company.

ART. 28. To see if the town will cause a fire-alarm box to be located at or near the works of McKenzie & Paterson, on Canal Street, and appropriate money therefor.

ART. 29. To see if the town will relay and enlarge the stone culverts in Newport Avenue, near Brooks Street and C. F. Adams's stable, and appropriate money therefor.

ART. 30. To see if the town will cause the obstructions in a water-course on Willard Street, near the O. T. Rogers Granite Company, to be removed.

ART. 31. To see if the town will set apart and fit up a portion of the Lyceum Room, or some other suitable place, for the use of the Police Officers and keeper of Lock-up, and appropriate money therefor.

ART. 32. To see if the town will buy a triangular piece of land, owned by John B. Reinhalter, at the junction of Copeland and Miller streets, and appropriate money therefor.

ART. 33. To see if the town will regrade Cross Street, near John Burke's, and appropriate money therefor.

ART. 34. To see if the town will appropriate one thousand dollars to repair and widen Common Street between Copeland and Cross Streets.

ART. 35. To see if the town will accept the report of the Selectmen, laying out a street from Grand View Avenue to Winthrop Avenue, and appropriate two hundred dollars therefor.

ART. 36. To see if the town will accept the report of the Selectmen, relocating and widening Canal Street, near its intersection with Washington Street, and appropriate money therefor.

ART. 37. To see if the town will accept the report of the Selectmen, widening Elm Street near the residence of Stedman Williams, and appropriate money therefor.

ART. 38. To see if the town will accept the report of the Selectmen, laying out Newhall Street, and appropriate fifty dollars therefor.

ART. 39. To see if the town will accept the report of the Selectmen, extending Hall Place to the residence of John Howley, and appropriate money therefor.

ART. 40. To see if the town will accept the report of the Selectmen, laying out and extending Quincy Street from Water Street to Penn Street, and appropriate money therefor.

ART. 41. To see if the town will accept the report of the Selectmen, laying out Wollaston Avenue, from a point on the easterly line of Hancock Street, near the entrance to the Quincy estate, to a point on Fenno Street, opposite the town park, and appropriate money for the same.

ART. 42. To see if the town will accept the report of the Selectmen, laying out Beach Street and Willow Avenue, and appropriate money therefor.

ART. 43. To see if the town will build a retaining wall on the south side of South Street, near the junction of Howard Street, and appropriate money therefor.

ART. 44. To see if the town will accept the report of the Selectmen, relocating Valley Street.

ART. 45. To see if the town will discontinue the townway leading from Hancock Street to Goffe Street, and accepted as Dimmock Street.

ART. 46. To see what compensation the town will allow the engineers, members and stewards of the Fire Department for their services during the past year.

ART. 47. To see if the town will vote to transfer two, or all, of the horses of the Fire Department to the Road Department, the latter to then furnish the motive power for hauling hose and engine.

ART. 48. To raise money to defray the necessary expenses of the town for the ensuing year.

ART. 49. To hear and act upon the report of any committee, and to choose any committee the town may think proper.

Hereof fail not, but make return of this warrant with your doings thereon, unto the Town Clerk, on or before the day of said meeting.

Given under our hands at Quincy, this fifteenth day of February, in the year of our Lord one thousand eight hundred and eighty-six.

GEORGE H. FIELD,
ELIAS A. PERKINS,
CHRISTOPHER A. SPEAR,
Selectmen of Quincy.

Officers' Return.

QUINCY, Feb. 17, 1886.

NORFOLK, SS.

Pursuant to the within warrant, I have notified the inhabitants of the Town of Quincy, herein described, to meet at the time and place, and for the purposes, within mentioned, by posting up attested copies of this warrant in ten or more public places in said town twelve days before the time set for said meeting; and I have likewise caused the substance of said warrant to be published in the *Quincy Patriot* and *Quincy Advertiser*, two public newspapers printed in said town of Quincy.

JOSEPH W. HAYDEN,
Constable of Quincy.

A true copy.

Attest: GEORGE L. GILL, *Town Clerk.*

ANNUAL TOWN MEETING, MARCH, 1886.

THE Annual Meeting of the inhabitants of the Town of Quincy was held pursuant to the foregoing warrant on Monday, March 1, 1886.

Chose, John Quincy Adams for Moderator, the vote being by ballot, and the check-list used.

Voted, To take up Article 25, and under said article the following vote was passed; namely, —

Voted, To accept the provisions of Sections 74, 75, 76 and 77 of Chapter 27 of the Public Statutes, and elect Road Commissioners.

Voted, That after the election of town officers, under Article 1 of the warrant, and the disposition of Article 3, the Moderator, without entertaining any other motion, shall declare this meeting adjourned, to meet at this place on Monday, March 22, 1886, at one o'clock P.M., at which time the remaining articles of the warrant shall be considered.

Voted, That the Moderator of this meeting, with the retiring Selectmen, the Selectmen-elect, and fifteen citizens to be appointed by the Moderator, — three of whom shall be inhabitants of the Centre District, three of the South District, three of the West District, two of the Wollaston District, two of the Atlantic District, and two of the Quincy Point District, — shall constitute a committee who shall consider the remaining articles of the warrant, and report at the adjournment of this meeting what action they consider it advisable for the town to take thereon, with suitable form of votes for carrying out their recommendations. They shall also publish in the *Quincy Patriot* and *Quincy Advertiser*, previous to said adjourned meeting, the action they intend to propose for the consideration of the town on the several articles submitted to them.

Voted, That the Moderator be requested to exclude from the hall, at said adjourned meeting, all non-voters excepting representatives of the press, and such other persons as he may think entitled to especial courtesy.

Voted, That this meeting proceed to vote for Town Clerk, Town Treasurer, three Selectmen and Assessors, two School Committee for three years, two Trustees of Thomas Crane Library for three years, two Managers of Adams Academy for three years, two Managers of Mount Wollaston Cemetery for two years, one Commissioner of Sinking Fund for three years, Collector of Taxes, three Road Commissioners for three, two, and one year, respectively, five members of a Board of Health, and fourteen Constables, all on one ballot; also to proceed to vote under Article 3.

Voted, To close the polls at 4 o'clock P.M.

The Town Clerk appointed George H. Field, Elias A. Perkins and C. A. Spear to act as Tellers during the election of

Moderator, and they were sworn by the Town Clerk; also, the Moderator appointed George H. Field, Elias A. Perkins, C. A. Spear, H. A. Keith, Edwin W. Marsh, and Walter M. Packard as Tellers, and they were duly sworn.

The result of the voting was declared by the Moderator to be the election of the following officers; viz.,—

George L. Gill for *Town Clerk*, and the oath of his office was administered to him by the Moderator.

Horace B. Spear for *Town Treasurer*.

George H. Field, William A. Hodges and William N. Eaton for *Selectmen and Assessors*.

Francis L. Hayes and Joseph M. Sheahan for *School Committee for three years*.

Harrison A. Keith and Henry Barker for *Trustees of Thomas Crane Public Library for three years*.

Josiah P. Quincy and Edward Norton for *Managers of Adams Academy for three years*.

George L. Baxter and Joseph H. Vogel for *Managers of Mount Wollaston Cemetery for two years*.

Quincy Tirrell for *Collector of Taxes*.

Abner B. Packard for *Commissioner of Sinking Fund for three years*.

John A. Gordon, Joseph L. Whiton, John H. Gilbert, Samuel M. Donovan and Frank A. Read for *Board of Health*.

Gordon McKenzie, *Road Commissioner for one year*.

John Cashman, *Road Commissioner for two years*.

John Q. Adams, *Road Commissioner for three years*.

Joseph Warren Hayden, Napoleon B. Fernald, Edward H. Richardson, Robert J. Williams, Marcus E. Wight, Francis A. Spear, George H. Lock, Mark E. Hanson, Charles N. Hunt, Walter H. Ripley, George O. Langley, William C. Seelye, Edward A. Spear and Amos L. Litchfield for *Constables*.

The following is the number of votes cast for the several candidates for town offices, as declared by the Moderator:—

<i>For Town Clerk.</i>		Christopher A. Spear . . .	794
George L. Gill . . .	1,594	Elias A. Perkins . . .	774
<i>Town Treasurer.</i>		James E. Maxim . . .	755
Horace B. Spear . . .	1,594	Scattering	8
<i>Selectmen and Assessors.</i>		<i>School Committee, 3 Years.</i>	
George H. Field . . .	821	Francis L. Hayes . . .	1,592
William A. Hodges . .	800	Dr. Joseph M. Sheahan, .	1,572
William N. Eaton . .	799	Scattering	4

<i>Trustees of Public Library,</i>	<i>Road Commissioner, 2 Years.</i>
3 Years.	
Harrison A. Keith . . . 1,593	John Cashman . . . 1,570
Henry Barker . . . 1,590	Scattering . . . 6
Scattering . . . 1	<i>Road Commissioner, 1 Year.</i>
<i>Managers Adams Academy, 3</i>	Gordon McKenzie . . . 852
<i>Years.</i>	John A. Duggan . . . 731
Josiah P. Quincy . . . 1,590	
Rev. Edward Norton . . . 878	<i>Constables.</i>
Rev. William R. Lord . . . 716	Robert J. Williams . . . 1,556
<i>Managers Mount Wollaston Cem-</i>	Walter H. Ripley . . . 918
<i>etery, 2 Years.</i>	Edward H. Richardson, . . . 902
Joseph H. Vogel . . . 1,584	Charles N. Hunt . . . 897
George L. Baxter . . . 895	Joseph Warren Hayden, . . . 893
James T. Penniman . . . 694	George O. Langley . . . 881
Scattering . . . 3	Edward A. Spear . . . 878
<i>Commissioner Sinking Fund, 3</i>	Napoleon B. Furnald . . . 872
<i>Years.</i>	William C. Seelye . . . 869
Abner B. Packard . . . 1,593	Mark E. Hanson . . . 859
<i>Board of Health.</i>	Marcus E. Wight . . . 856
Joseph L. Whiton . . . 1,592	Amos L. Litchfield . . . 851
Dr. John H. Gilbert . . . 1,592	George H. Locke . . . 816
Frank A. Read . . . 1,591	Francis A. Spear . . . 816
Dr. Samuel M. Donovan, . . . 1,583	Samuel B. Turner . . . 781
Dr. John A. Gordon . . . 890	Thomas F. Ferguson . . . 762
Horatio N. Holbrook . . . 700	George B. Pray . . . 733
Scattering . . . 5	James M. Galvin . . . 721
<i>Collector of Taxes.</i>	John Barry . . . 693
Quincy Tirrell . . . 965	Joseph T. French . . . 691
George H. Locke . . . 628	Stephen N. Swain . . . 690
<i>Road Commissioner, 3 Years.</i>	Joseph W. Lombard . . . 685
John Quincy Adams . . . 1,553	John McGilvray . . . 684
Scattering . . . 9	Nathan G. Glover . . . 677
	Michael Sweeney . . . 673
	Joseph Walker . . . 672
	James Haverhan . . . 665

The following Town Officers were also elected : —

Overseers of the Poor. — George H. Field, William A. Hodges and William N. Eaton.

Park Commissioner. — George Cahill.

Pound-keeper. — George H. Field.

Auditors. — Elias A. Perkins, George H. Locke and Harrison A. Keith.

Fence Viewers.—Charles S. French, Ebenezer Adams and George Veazie.

Field Drivers.—Frank L. Merrill, Samuel B. Turner, Thomas Kennon and Bartholomew Reardon.

Committee to consider the remaining Articles of the Warrant.—John Quincy Adams, George H. Field, William A. Hodges, William N. Eaton, Christopher A. Spear, Elias A. Perkins, Theophilus King, Charles H. Porter, Sigourney Butler, Edwin W. Marsh, John H. Dee, W. G. A. Pattee, Jonas Shackley, Joseph W. Robertson, Joseph Vogel, Jason G. Witham, H. T. Whitman, James H. Slade, Herbert M. Federhen, James Burr, John A. Duggan.

The vote of the town on the question, "Shall licenses be granted for the sale of intoxicating liquors in this town?" was as follows; viz.,—

Yes, 258; no, 1,017.

In accordance with the vote of the town, the meeting was adjourned to Monday, March 22, 1886, at one o'clock P.M.

Attest: GEORGE L. GILL, *Town Clerk.*

ANNUAL TOWN MEETING.—BY ADJOURNMENT.

MONDAY, March 22, 1886.

The annual Town Meeting was held this day, by adjournment from March 1, 1886, John Quincy Adams, *Moderator.*

Voted, That no motion to reconsider any vote shall be in order, unless the mover thereof shall give notice of his intention to do so, before the town has passed from the consideration of the article under which the question was taken.

Voted, That debate on the main question* shall be in order pending the verification of a doubtful vote.

Voted, That during the discussion of any measure it shall be in order for any voter rightfully in possession of the floor, to move that the main question be now put. Such motion shall be submitted to the meeting without debate, and if carried by a two-thirds vote, the main question shall be put to vote without further debate.

The Moderator appointed Messrs. Sigourney Butler, Warren W. Adams, Herbert M. Federhen, William G. A. Pattee, William L. Faxon and Lewis Bass to count and report the number of votes upon all matters, when, by reason of doubt, the Moderator may find it necessary to order a count.

The following articles of the warrant, which were acted upon in their due order, were by vote, indefinitely postponed: —

ART. 14. Concerning fulfilment of conditions for Faxon Park.

ART. 16. Concerning planting trees on public highways.

ART. 20. Concerning new location for engine-house at Atlantic.

ART. 21. Concerning purchase of land for same.

ART. 24. Concerning acceptance of sections of Chap. 27, Public Statutes.

ART. 32. Concerning purchase of land of John B. Reinhalter.

ART. 35. Concerning new street from Grand View Avenue to Winthrop Avenue.

ART. 36. Concerning report on re-locating and widening Canal Street.

ART. 47. Concerning transfer of horses from the Fire to the Road Department.

Voted, That the report of the Auditors, Selectmen, School Committee, Trustees of Crane Public Library, Adams Academy, Managers of Mount Wollaston Cemetery, and Park Commissioners, be accepted and filed with the town documents.

Voted, That the highways be repaired under the supervision of the Road Commission.

Voted, That the town land be improved under the supervision of the Overseers of the Poor.

Voted, That the Jury list submitted by the Selectmen, is hereby accepted, the name of John Federhen, 3d, having been first stricken out.

Voted, That the Selectmen may lot off, and sell by plan and lots, or in gross to one or more purchasers, or in such other manner as they may deem most for the public interest, the land on Adams Street, known as the "Newcomb lot," or any part thereof, and may execute and deliver suitable deed or deeds thereof, on behalf of the inhabitants of Quincy, and the proceeds, after deducting the necessary expenses of the sale, shall be paid over to the Commissioners of the Sinking Fund, who shall receipt therefor, and forthwith apply the same to the purposes of said fund.

Voted, That the report of the Selectmen on guide-boards be accepted and placed on file.

Voted, That the sum of two hundred dollars be appropriated for the purpose of keeping in repair or decorating the graves, within the limits of Quincy, of soldiers and sailors who died in the military service of the United States, or the monuments or other memorials erected to their memory, the same to be ex-

pended under the direction of Post 88 of the Grand Army of the Republic, and the treasurer and commander of said Post shall furnish to the Selectmen a true and detailed account, duly itemized and certified by them, of the manner in which said sum was expended, within thirty days after Decoration Day.

Voted, That the Selectmen grant the free use of the Town Hall whenever it is requested in writing by not less than two citizens of the town, for a free lecture on any scientific, literary, or moral topic, subject to such regulations as they may deem expedient; and that two hundred dollars be appropriated to defray the cost thereof.

Voted, To take up Article 2 of the warrant.

Chose, William Faxon for *Field Driver*.

Voted, To re-consider the vote whereby the town voted to choose fourteen Constables.

Voted, To choose one additional Constable, making in all fifteen.

The Moderator appointed Messrs. William A. Hodges, William N. Eaton and George H. Field as Tellers to check the voting-list, and assist in receiving, sorting, and counting the ballots; and they were sworn by the Town Clerk. The result of the balloting was declared to be the election of Henry H. Faxon for Constable. The whole number of ballots being 116; for Henry H. Faxon 115, and for Theophilus King 1 vote.

Voted, That the town appropriate one thousand dollars for the enforcement of the laws relating to the sale of intoxicating liquors; and Henry H. Faxon is hereby declared to be the agent of the town for the enforcement of said law under said appropriation.

Voted, That the land given to the town by Charles Francis Adams, jun., for park purposes, which was accepted by the town at a town-meeting held Sept. 24, 1885, and by said meeting named Adams Park, be, at the request of the donor, renamed and hereafter known as Merry Mount Park.

Voted, That the matter of placing stone crossings at five or more commonly used crossings in the centre, and at such other parts of the town as seem necessary, be referred to the Road Commissioners.

Voted, That the sum of one hundred and seventy-five dollars, or so much thereof as may be necessary, be appropriated for the laying out and grading of the triangular piece of land at the junction of School and Pleasant streets, to be expended under the direction of the Road Commissioners at their discretion.

Voted, That the By-laws of the Mount Wollaston Cemetery be amended by striking out of Article 1 the words: —

“Regular meetings of the Board shall be held as often as once each month, and at such hour and place as a majority of the Board shall determine.”

Also by striking out of Article 5 the words: —

“He shall keep in books, provided for the purpose, regular and accurate records of all interments, including the date of interment, the name, age, and place of residence of the deceased, the number of the lot, and the name of the undertaker; also of all monuments erected, and lots enclosed and improved; also of all moneys received or disbursed by him, whether for wages, fees, improvements of lots, sales of any kind, purchases made, or services rendered. On the first Monday of each month, or oftener if required by the Board, he shall render to the Secretary a true statement of all the above copies of said accounts, with proper vouchers, and pay over to him all moneys remaining in his hands.”

Strike out of Article 9 the words: —

“No lots shall be sold except to actual residents of the town.”

And *insert* in place of them the following: —

“No lots shall be sold excepting to actual residents of the town, or to the proprietor of tombs in the old cemetery, who may purchase one lot for each tomb, and no more; and only one lot shall be sold to one grantee unless authorized by the Board of Managers, and said lot shall be only for a family burial-lot for the grantee named in the deed, subject however to such lawful transfer as is hereinafter provided.”

Also strike out from said Article 9 the words: —

“No transfer of any lots shall be allowed except by vote of the Board; and no person to whom such transfer shall have been made shall acquire any title or rights under the same till such vote shall have been obtained.”

And *insert* the following: —

“No transfer of any lots shall be allowed excepting by vote of the Board of Managers, and in no case shall a transfer be made to a non-resident.” “No person shall acquire any right or title to any lot by virtue of any transfer until the same shall be approved by the Board.”

Strike out the words: —

“In the future sales of lots the proprietors thereof shall conform to the plan of the same.”

And *insert* the following: —

“In the future sales of lots, the proprietors thereof shall conform to the plan of the same, and no sale shall be made of ungraded lots.”

Voted, That a new edition of said By-laws be printed under direction of the Board of Managers.

Voted, That a committee of five be chosen to arrange with the Board of Managers of the Mount Wollaston Cemetery, and the Trustees of the Woodward Fund, for an extension of the cemetery on the northerly side by taking a part of the large lot of vacant land belonging to said Woodward Fund, said committee to report in print in the town book, for the action of the town at the annual meeting in March, 1887; and Messrs. Christopher A. Spear, John A. Gordon, William B. Rice, Peter Butler and Charles R. Sherman were chosen said committee.

Voted, That the sum of five hundred dollars be appropriated to secure an Assessors' map, to be spent under direction of the Selectmen.

Voted, That the matter of providing some means of ventilating the cells of the Lock-up be referred to the Selectmen with full powers.

Voted, That the report of Committee on Roads be accepted, and referred to the Road Commissioners for their information, and that the sum of \$25,000 be appropriated to be spent under direction of Road Commissioners for repairs and construction of roads and purchase of machinery.

Voted, That the Selectmen are hereby authorized to sell at public auction the land and house on Canal Street, now occupied by the Hook and Ladder Company.

Voted, That the matter of placing a fire-alarm box at or near the works of McKenzie & Paterson be referred to the Board of Engineers; and that the sum of \$100 be appropriated to be spent under their direction if they deem it expedient.

Voted, That the Road Commissioners rebuild and enlarge the stone culvert on Newport Avenue near Brooks Street, and \$200 be appropriated for that purpose.

Voted, That the matter of the obstructions in a water-course on Willard Street, near the O. T. Rogers Granite Company, be referred to the Road Commissioners with full powers.

Voted, That two cells on the easterly end of Lock-up be taken away, and that the Lock-up be extended in a westerly direction; that a room be partitioned off on the easterly end for the use of Police Officers, and \$375 be appropriated for that purpose, to be expended under the direction of the Selectmen.

Voted, That the matter of regrading Cross Street near John Burke's be referred to the Road Commissioners.

Voted, That the matter of repairing and widening Common

Street, between Copeland and Cross streets, be referred to the Road Commissioners to report a plan and estimate of the cost of the same, the entire length of said street from Copeland to Adams Street.

Voted, That Article 36 relative to relocating and widening Canal Street, be indefinitely postponed, and that the Road Commissioners report a plan widening and straightening said street from Washington to Coddington Street.

Voted, That Article 37 relative to widening Elm Street be referred to the Road Commissioners to take such action necessary to have said street widened and relocated from Hancock to Washington Street.

Voted, To accept the report of the Selectmen laying out Newhall Street, and that the sum of fifty dollars be appropriated therefor.

Voted, To accept the report of the Selectmen extending Hall Place to the residence of John Howley, and that the sum of \$300 be appropriated therefor.

Voted, To accept the report of the Selectmen laying out and extending Quincy Street from Water Street to Penn Street, and that the sum of \$200 be appropriated therefor.

Voted, To accept the report of the Selectmen laying out Wollaston Avenue from a point on the easterly line of Hancock Street, near the entrance to the Quincy estate, to a point on Fenno Street, opposite the Town Park, and that the sum of \$200 be appropriated therefor.

Voted, To accept the report of the Selectmen, laying out Beach street and Willow Avenue, and that the sum of fifty dollars be appropriated therefor.

Voted, That the matter of building a retaining wall on the south side of South Street, near the junction of Howard Street, be referred to the Road Commissioners.

Voted, To accept the report of the Selectmen relocating Valley street.

Voted, To discontinue the town way leading from Hancock Street to Goffe Street, and accepted as Dimmock Street.

Voted, That the sum of \$1,165 be appropriated for the compensation of the engineers, members and stewards of the Fire Department for their services the past year. *Also*, that the sum of \$4,235 be appropriated for the current year; total, \$5,400. The same to be applied as follows; viz., —

Voted, To raise and assess on the polls and estates of the town, the sum of one hundred and thirty thousand (\$130,000) dollars, to be applied for the purposes set forth in the foregoing vote.

Voted, That the Town Treasurer be and is hereby authorized to issue notes of the town for \$25,000, or as much thereof as may be necessary, being the sum required to pay the balance due for the erection of a brick schoolhouse on Granite Street, authorized at the special town-meeting held Sept. 24, 1885. Said notes to fall due as follows: 10,000 in the year 1887; 5,000 in the year 1888; 10,000 in the year 1890; and that a committee consisting of three citizens be appointed by the Moderator to negotiate the notes, and Messrs. Charles H. Porter, Theophilus King and Charles F. Adams, jun., were appointed said committee. This vote was passed by a vote of more than two-thirds of the voters present and voting.

Voted, That the report of the Selectmen on Sewerage be accepted and placed on file. That a committee of seven, consisting of the Moderator and six other citizens to be appointed by the Moderator, to consider the necessity of additional legislation, secure the same if deemed advisable, and report their action to next annual town-meeting, and \$100 be appropriated for use of committee, and the following committee was appointed: Messrs. John Q. Adams, Herbert M. Federhen, J. Q. A. Field, William G. A. Pattee, Theophilus King, Sigourney Butler and Francis L. Hayes.

Voted, That the thanks of the town be given to John Quincy Adams for his efficient services as Moderator, also to the Committee on Warrant for its valuable services.

Attest:

GEORGE L. GILL, *Town Clerk*.

Voted, that this meeting be dissolved.

WARRANT FOR STATE ELECTION, Nov. 2, 1886.

NORFOLK, SS.: *To either of the Constables of the Town of Quincy, in said County,*

GREETING:

In the name of the Commonwealth of Massachusetts, you are hereby required to notify and warn the inhabitants of the Town of Quincy, qualified to vote in elections, to meet at the Town Hall, in said Quincy, on Tuesday, November 2, 1886 (it being the Tuesday next after the first Monday in said November) at seven o'clock and thirty minutes in the forenoon, to give in their votes to the Selectmen, on one ballot:—

For Governor of the Commonwealth, Lieutenant-Governor of the Commonwealth, Secretary of the Commonwealth, Treas-

urer and Receiver-General of the Commonwealth, Auditor of the Commonwealth, and Attorney-General of the Commonwealth;

Councillor for District No. 2, Representative to Congress, District No. 2, Senator for the First Norfolk District, District Attorney for the South-eastern District, Three Representatives to represent the Fifth Norfolk District in the next General Court, to be held in Boston on the first Wednesday of January, next;

Sheriff for Norfolk County for three years, Clerk of the Court for Norfolk County for five years, County Commissioner for Norfolk County for three years, Two Special Commissioners for Norfolk County for three years, Three Commissioners of Insolvency for Norfolk County for three years.

The names of the candidates for all of the above-mentioned offices must be borne on one ballot, to be presented open, or unfolded, or enclosed in a sealed envelope, at the option of the voter.

The polls for the reception of the ballots aforesaid, will be opened at seven o'clock and thirty minutes, in the forenoon, and will be kept open four hours, and such further time as the meeting may determine.

And you are hereby directed to serve this notice by posting an attested copy of the same in two or more public places within said town, and by publishing the same in the *Quincy Patriot*, a newspaper printed in Quincy, seven days, at least, before the time of holding said meeting.

Hereof fail not, but make due return of this warrant, with your doings thereon, unto the Town Clerk, on or before the day and time appointed for said meeting.

Given under our hands at Quincy, this twentieth day of October, in the year of our Lord, one thousand eight hundred and eighty-six.

WILLIAM A. HODGES,
GEORGE H. FIELD,
WILLIAM N. EATON,

Selectmen of Quincy.

NORFOLK, ss., October 21, 1886.

Pursuant to the within warrant, I have notified the inhabitants of the Town of Quincy, herein described, to meet at the time and place, and for the purposes within mentioned, by posting up attested copies of this warrant at seventy public places in said town, twelve days before the time set for said meeting,

and I have likewise caused the substance of said warrant to be published in the *Quincy Patriot* and *Quincy Advertiser*, two newspapers printed in said town of Quincy.

JOSEPH W. HAYDEN, *Constable of Quincy.*

A true copy.

Attest: GEO. L. GILL, *Town Clerk.*

RECORD OF THE ANNUAL STATE ELECTION, Nov. 2, 1886.

A meeting of the inhabitants of the town of Quincy was held, pursuant to the foregoing warrant, on Tuesday, Nov. 2, 1886.

Voted, To close the polls at three o'clock P.M.

Edwin W. Marsh and Robert J. Williams were appointed by the Selectmen to act as Tellers, and they were duly sworn by the Town Clerk.

Votes were received by the Selectmen, and sorted and counted as directed by the law of 1884, and the total number was found to be 1,620. A count of the check list was made, as required by said law, and the number of names checked was found to be 1,620. The ballot-box required to be used was opened, by the unanimous consent of the officers named in said law, at sundry times during the day, and a count made of the ballots at each opening. At the close of the voting, the ballot-box register showed that 1,630 ballots had been cast, the error in registering being caused by the imperfect working of the box.

The result of the voting was declared to be, for the offices and the persons voted for, as follows:—

REPORT
OF THE
SCHOOL COMMITTEE
OF THE
TOWN OF QUINCY,
FOR THE
SCHOOL-YEAR 1886-87.

School Committee.

SIGOURNEY BUTLER.
SYLVESTER BROWN.
FRANCIS L. HAYES.

JOHN A. GORDON.
ADELAIDE A. CLAFLIN.
JOSEPH M. SHEAHAN.

Superintendent.

GEORGE I. ALDRICH.

BOSTON:
FRANKLIN PRESS: RAND AVERY COMPANY.
1887.

REPORT OF THE SCHOOL COMMITTEE OF THE TOWN OF QUINCY, FOR THE SCHOOL-YEAR 1886-87.

TO THE INHABITANTS OF THE TOWN OF QUINCY:—

Your School Committee presents the following report for the past year:—

THE NEW SCHOOLHOUSE.

The most important event in the past school-year was the completion and opening of the new schoolhouse. Your Committee thinks that the prediction of last year's school report, that the town would "secure a schoolhouse, when completed, which, in point of excellence and general desirability for the purpose, will equal any in the Commonwealth," was not pitched in too high a key. The approbation of those acquainted with the requirements of a public school-building, has been most hearty and unanimous; and the fact that since the building's completion, the neighboring town of Brookline — which ranks high in all educational matters — has adopted the same general design for an eight-room school-building, for which appropriation has already been made, is evidence that the design commends itself to those who understand the architectural demands of a schoolhouse.

The town originally contemplated spending \$8,000 on a school-lot, to be located in the south-west portion of the town. The lot purchased contained two acres and three-quarters, and its original cost was about \$5,600. Since its purchase, some \$250 has been spent in grading and filling up the low land alongside the town brook. Without this filling, however, there is vastly more play-room about the building than at any other school in town. Filling in the low land is not essential, therefore, if space only be desired; but the general appearance of the town property, as well as of the neighborhood, would be improved by cleaning out the brook, and filling to it. Constant deposits of the washings from a polishing-shop just above Water Street, have accumulated in that part of the brook east of the

street; these accretions choke the stream, and at times of high water back the brook up immoderately. It is proper that the town by its School Committee, or by some other of its officers, should remedy this matter; the brook should be widened, deepened, straightened, and stoned up, as in its course farther down stream. This would not only benefit one portion of the school-lot, but it would be a great improvement to property in the neighborhood.

In selecting a name for the new school, your Committee recognized the fact that to each of the other schools in the town has been given a name of general historic interest, — Quincy, Wollaston, Coddington, Adams, Willard and Washington, — and, with one exception, of lasting connection with the town's history. John Hancock's name, however, has never yet been perpetuated in this way. Born in the old North Precinct of Braintree (now Quincy) — married into that family which afterwards gave its name to the town — so violent a rebel as to be one of the two Massachusetts men to whom the British crown offered no pardon, and upon whose head a price was set — a prominent town-officer of Boston, when Boston was the foremost town of the Colonies — president of the congress that made the Declaration of Independence — the first governor of this Commonwealth, and for ten years its chief executive, — John Hancock was certainly a very representative man of his time, and it is a little remarkable that in this age of rather indiscriminate perpetuation of the memory of men more or less great, no other testimonial to his worth could be found in this town, than the name of a street, and the recollection in some men's minds of the cellar-hole denoting his birthplace, now covered by the Adams Academy Schoolhouse. It seemed fitting, therefore, that the new school should bear his name.

RE-DISTRICTING.

By the opening of the John Hancock School, the much-needed relief to the primary grades of the Adams and Willard schools was given. Already five rooms in the new schoolhouse have been filled by children of the B, C and D primary grades. This school bids fair to contain only children of the primary grade, which, as is well understood, greatly outnumbers the grammar grades. It was impossible at the start to fix the limits for the new district otherwise than approximately. The experience of this school-year, however, has been of value, and the lines for the Willard, John Hancock, Adams and Coddington schools should be run anew for primary districts, leaving the grammar grades districted as at present.

EVENING DRAWING SCHOOL.

Your Evening Drawing School has nearly completed its second year. Pursuing the suggestion of last year's report, an advanced class, made up of men who took the first-year course, was established. This class has done most satisfactory work, and the benefit to its members this year is even more marked than in their first year. It is doubted if there exists in the Commonwealth an evening drawing school where the attendance is better, or the interest of the students deeper, than in the two classes of our school. The reason for this lies in the fact that seven out of eight of the students are men who have a common employment,—the working of granite. In this we have an advantage over most evening drawing schools. The students do not come to the school on the general principle that learning to draw is likely to help them in some occupation; but they come with a perfectly definite object, in desiring instruction in that which will materially and directly aid them in their chosen avocation. This unanimity of purpose, this concentration of ideas in the students' minds, is immediately reflected in the work of the instructor. Knowing what the students want, he is enabled from the first to so map out and arrange their work that results most useful to them may be obtained. A full sympathy between the instructor and the students exists, and it is a pleasure to see with what industrious zeal the teacher's efforts are rewarded. As a result, the men report that in their daily employment they have been greatly assisted by their instruction; for instance, among the stone-cutters, the experience obtained in the school has been of material help in the "reading of drawings" at their work.

The second-year class is naturally somewhat smaller than the first year, and there are several drawing-tables vacant. Your Committee believes that next year there might be established a third-year class, to take these unoccupied tables. The teachings of the second year would be continued, and a course in freehand drawing given, so adapted as to be of service to men in the stone business. This would not be an extra expense, as the instructor would teach the second and third years at the same time.

It must not be thought that this school is intended solely for the workers in granite, to the exclusion of those of other occupations; but where the proportion of stone-workers to those of all other occupations in the school is so overwhelmingly in favor of the former, it seems only right that the instruction should conform as closely as possible to the actual needs of the students.

The present room should not be used much longer for the Drawing School. It is small, and quite devoid of any good means of ventilation. The large hall at the top of the John Hancock School would make an admirable room for the Evening Drawing School. The schoolhouse is conveniently located for very many of the workers in stone. The hall is lofty and spacious: thus the great heat generated by the large number of lights over the students' tables would be carried off. The only reason that your Committee is not prepared to unqualifiedly recommend the removal of the Drawing School to this hall upon the expiration of the present lease, is the question of lighting. At present, the pipes of the Gas Company do not extend either on Granite or on Water Street as far as the schoolhouse. Gas-burners are no better light to work by than first-rate kerosene lamps; but for the purposes desired, the safety, neatness and reliability of gas is much greater than kerosene lamps.

WOLLASTON.

The village of Wollaston is so situated that any increase in its school population cannot well be cared for by relocating the boundaries of the neighboring districts. The increase of scholars is shown by the Superintendent's report, hereto appended. Those familiar with the past growth and the future prospects of Wollaston are confident in their belief that the ratio of increase for the past twelve years, will continue during the next twelve years. The seating capacity of the school is also shown in the Superintendent's report. Comparing the tables of attendance and seating capacity, it is plain that more room must soon be provided. Shall this be acquired by an addition to the present schoolhouse, or by the erection of a new building to be used in connection with, and as an annex to, the present house, similar to the annex at the Coddington School? Any one well acquainted with the architectural design of the Wollaston School will admit the inherent difficulties attending any attempt to add to this building the required room. There is a vacant part of the Wollaston school-lot, westerly of the schoolhouse, making the south-east corner of Beale and Prospect streets, and containing some eight thousand square feet of land. Here is an available parcel, with ample room for a two-storied schoolhouse of four rooms, accomodating two hundred children. Your Committee recommends that in the near future the town appropriate enough money to construct a plain, four-roomed, two-storied building of wood, following the same general design as in the John Hancock School,—every room lighted from

the south only, with a corridor on the north side. Such a structure would admit of addition in the future, and would be as easily cared for by the principal of the school as is the annex at the Coddington.

FIRE-DRILLS.

Fire-drills have been established in our schools, to meet the particular requirements of each school-building. The usefulness of these drills hardly needs explaining. Constant drill subordinates the naturally tumultuous impulse of the imagination to the deliberate mechanical movements of the body, and in course of time renders the most nervous child quite indifferent to the alarm of fire. As an example of good drill, the Adams School, which, it will be remembered, has two classes located in the third story, has been emptied on a spring day, with full attendance, in a little over two minutes.

SINGING.

It is a pleasure to report the success attending the introduction in our schools of the systematic teaching of singing, embracing therein the use of the voice, and the reading of music. There is no better, simpler, or more logical method of teaching music to children than that adopted by Mr. Wade. Of course there has always been singing in the public schools, but the singing of the pupils depended on the taste or musical acquirements of the respective teachers; and at times the former, or again the latter, was found to be pretty weak. One rarely finds a child to whom proper musical instruction has been given early in life, that cannot sing and has no appreciation of music. To give the child such instruction, it is not enough to set him singing at the top of his voice some simple Sunday-school hymn or nursery ballad, with innumerable repetitions of the same. He must be taught notes and the intervals, and to combine certain notes and intervals so that certain effects of melody are produced. He must be taught the principles of time, and, finally, the combining of notes to make harmony. All this time he is becoming impressed with the fact, that, to make good music, a pure quality of tone with clear enunciation, rather than a vast quantity of lung-power, is needed. The excellence of the method followed by Mr. Wade is shown in the highly gratifying way in which our teachers have acquired his system, and are now instructing the scholars, under his supervision.

Americans are a music-loving people. Music is fast becoming as much of a necessity as are holidays — in fact, to be the one

indispensable component part of our holidays. No day of pleasure is complete without a musical accompaniment, which year by year is attaining a higher standard. It seems right that we should give to every one the greatest possible opportunity to enjoy to his utmost that art which is capable, more than any other, of producing the keenest sense of delight and pleasure. When we see open-handed citizens spending large sums of money to put the very best music within the reach of almost every one, it seems right that we should meet such a spirit half-way, and lay the foundation for the proper enjoyment of such advantages.

Quincy has enjoyed the reputation of keeping well in advance on all educational matters; and it is interesting to note, that a very strong petition has just been presented to the General Court, asking that the State Normal system be so extended as to include music, "to the end that excellence and uniformity of method may be secured in the musical instruction now nearly universal in our public schools."

ROOM FOR THE SCHOOL COMMITTEE.

No satisfactory quarters could be found until the new block of Messrs. Durgin & Merrill was erected, wherein suitable rooms have been secured. Of the appropriation of \$175, therefore, nothing has been spent for rent; but the sum of \$60 has been laid out in furniture for the room, which will soon be ready for occupancy.

HIGH SCHOOL: FOURTH YEAR.

Last year it was the regret of the Committee that no graduates in 1885 of the High School had availed themselves of the opportunities presented by the fourth-year course. This year, however, your Committee is pleased to report a fourth-year class of seven scholars.

ABUTTING WAYS.

When the Willard school-lot was purchased, and the school-house built, — in 1854, — the lot bounded easterly on a private way that led from Copeland Street, in a southerly direction, to what is now known as Miller Street. At that time the West District was small, the school was small, and there was but little passing over this private way. But as time has gone on, the population has greatly increased, the schoolhouse has been twice enlarged — until it is now a twelve-room building — and the travel over the way is very much greater. The fence that makes the easterly boundary of the way is but a few feet from the easterly side of the building, and from the easterly doors,

through which the entrance and exit of the scholars are made. The danger to children, playing about the yard or coming from the building, of being knocked down or run over by the ponderous stone-teams that may be passing over this way, is certainly very great, and, when it is considered that there are between 500 and 600 children constantly in attendance at the school, it seems quite remarkable that no serious accident has as yet occurred.

Your Committee believes that the town should certainly close up this way to the public, despite the fact that it has suffered it to continue for thirty-three years. If the town advises in the negative, the Committee will feel that it has given fair warning if any accident occur in the future.

Acting on the same principle, it is hoped that an arrangement may be made by which the continuous private ways, known as Gordon Street and Nightingale Street respectively, running from Granite to Water streets, and forming the north-westerly boundary of the John Hancock school-lot, may be forever closed to the general public, and only used when required by the abutters for their own private purposes. The heavily-laden stone-teams that use these ways as a thoroughfare are a standing menace to the safety of our school-children.

SCHOOL CENSUS.

The following table shows the official census of children in the town, between the ages of five and fifteen years:—

	1882.	1883.	1884.	1885.	1886.
Adams	501	523	588	520	727
Coddington	362	388	432	409	461
Washington	312	337	356	308	376
Willard	646	706	802	693	939
Wollaston	202	213	236	229	242
Quincy	291	279	320	257	343
	2,314	2,446	2,734	2,416	3,088

FISCAL STATEMENTS.

The receipts and expenditures on account of the schools for the past year are as follows:—

Appropriated by town at annual meeting in March, 1886	\$47,700 00	
Our share of State school-fund	162 22	
Received from Coddington fund	75 00	
“ sale of Willard out-buildings	32 50	
“ Old Colony Railroad for broken slate	7 94	
		\$47,977 66

Expenditures.

Teachers' salaries	\$30,711 76	
Fuel	1,733 88	
Care of rooms	2,718 23	
Superintendent's salary	1,666 62	
Incidentals	4,175 36	
Transportation	814 00	
Books and stationery	2,242 41	
Repairs	1,939 43	
Out-building at Willard School	930 00	
Evening Drawing School	995,27	
		47,926 96
Balance unexpended		\$50 70

Your Committee recommends that the following appropriations be made for the school expenses of the year to come:—

For superintendent's and teachers' salaries, fuel, and care of rooms	\$39,580 00	
Transportation	900 00	
Repairs on buildings	2,000 00	
Books and stationery	2,000 00	
Incidentals	3,200 00	
		\$47,680 00
Improvements at John Hancock School	1,000 00	
Evening Drawing School	1,000 00	
		\$49,680 00

A comparison of the record of attendance for the year ending Jan. 1, 1887, with that for the year ending Jan. 1, 1886, as exhibited in the reports of the superintendent, shows an increase

of 300 pupils in the average membership of the schools, and of 262 in the average daily attendance. Such an increase of scholars necessarily demands an increase of the appropriation for teachers' salaries.

In conclusion, your Committee reports that the schools are in good condition, and the scholars are happy and contented, and making satisfactory progress under a faithful and conscientious corps of teachers. As in former years, we suffer from changes of teachers, caused by their resignation to receive higher salaries in other places. But this we must bear with equanimity, for the town is and has been generous to its schools, and it would be unreasonable to ask for such an appropriation as would make a material increase in the salaries paid to our teachers. Your committee fully appreciates, however, the fact that much of the disadvantage of such changes is offset by the efficiency and ability of Mr. Aldrich, our Superintendent, who by his close surveillance and unremitting care strengthens any weak spot as soon as it appears.

It is a matter of congratulation that the towns of Quincy and Milton have succeeded in retaining the services of Mr. Aldrich, despite the very flattering and urgent offers to him of the principalship of the Westfield State Normal School by the State Board of Education.

REPORT OF THE BUILDING COMMITTEE FOR THE NEW SCHOOLHOUSE.

TO THE INHABITANTS OF THE TOWN OF QUINCY:—

Pursuant to the vote of the town of Sept. 24, 1885, authorizing an expenditure of \$35,000, your Building Committee proceeded with the construction of the new schoolhouse, near the junction of Granite and Water streets, and had it ready for occupancy by the School Committee at the opening of the schools last September. The plans of Messrs. Cabot & Chandler finally adopted, differed but little from the general scheme favored by the committee appointed in the summer of 1885, upon whose recommendation the vote above referred to was passed.

The building is constructed of good Eastern brick, with slate roof. The main features sought in this school are,—

1. Large schoolrooms, lighted only from the south,—thus obtaining plenty of sunlight,—with a capacity of fifty seats facing to the west, that every scholar may get the light over his left shoulder.

2. Coat-rooms, also lighted from the south, and so situated that the teacher may at the same time command a view of the schoolroom and the coat-room.

3. Spacious, straight, well-lighted hallways running the length of the building on the north side, with a broad, easy staircase at each end.

4. Steam-heating by indirect radiation:

5. Teachers' dressing-rooms.

6. Large playrooms in the basement, also lighted from the south, and communicating by a covered way with the water-closets.

7. Ample means of egress.

Your Committee believes that the building as completed fulfils the above conditions, and is constructed on such a plan that additions, if deemed necessary, may in future be made without altering the original design, and consequently at no increased ratio of expense. The cost of the building is shown in the itemized accounts of the Auditors' report.

For a detailed description of the building, your Committee begs leave to refer to the report of the Superintendent of Schools.

After the contracts had been made, and the construction of the building had begun, the attention of your Committee was called to a quality of blackboard slate, so superior in color and finish that it was deemed best to substitute it for the ordinary composition blackboarding, on the sides of the room used by the scholars for their blackboard work. Being more expensive than the composition, it was thought advisable to put the slate only on the rooms — five in number — first to be occupied by scholars, that it might have a long and thorough test. Your Committee believes, however, that the slate will prove entirely satisfactory, and, although more costly at the start than the composition, is, in truth, an economy, in that it never has to be replaced.

We consider the basements a valuable part of the building. They are as bright and light as most of the schoolrooms in town, and are heated not only by the steam-boiler, but by the sunlight, through a row of windows the entire length of the building. The basement is thus kept so dry, that the gravel floor first laid has proved inadequate, owing to the dust that is raised by many feet passing over it. To obviate this, a cement floor should be laid. A heavy coating of beach-gravel might be put down; but the length of time that would elapse before it was trodden into place, aside from the consequent noise and discomfort, would more than counterbalance the saving in price. The fact is now pretty well established that this school will for some time to come be occupied by children of the primary grades. To these little ones who are least able to withstand inclement weather, the airy, bright, and sunny playrooms are quite indispensable in the winter months. Therefore your Committee begs leave to suggest that the entire basement floor be laid in cement.

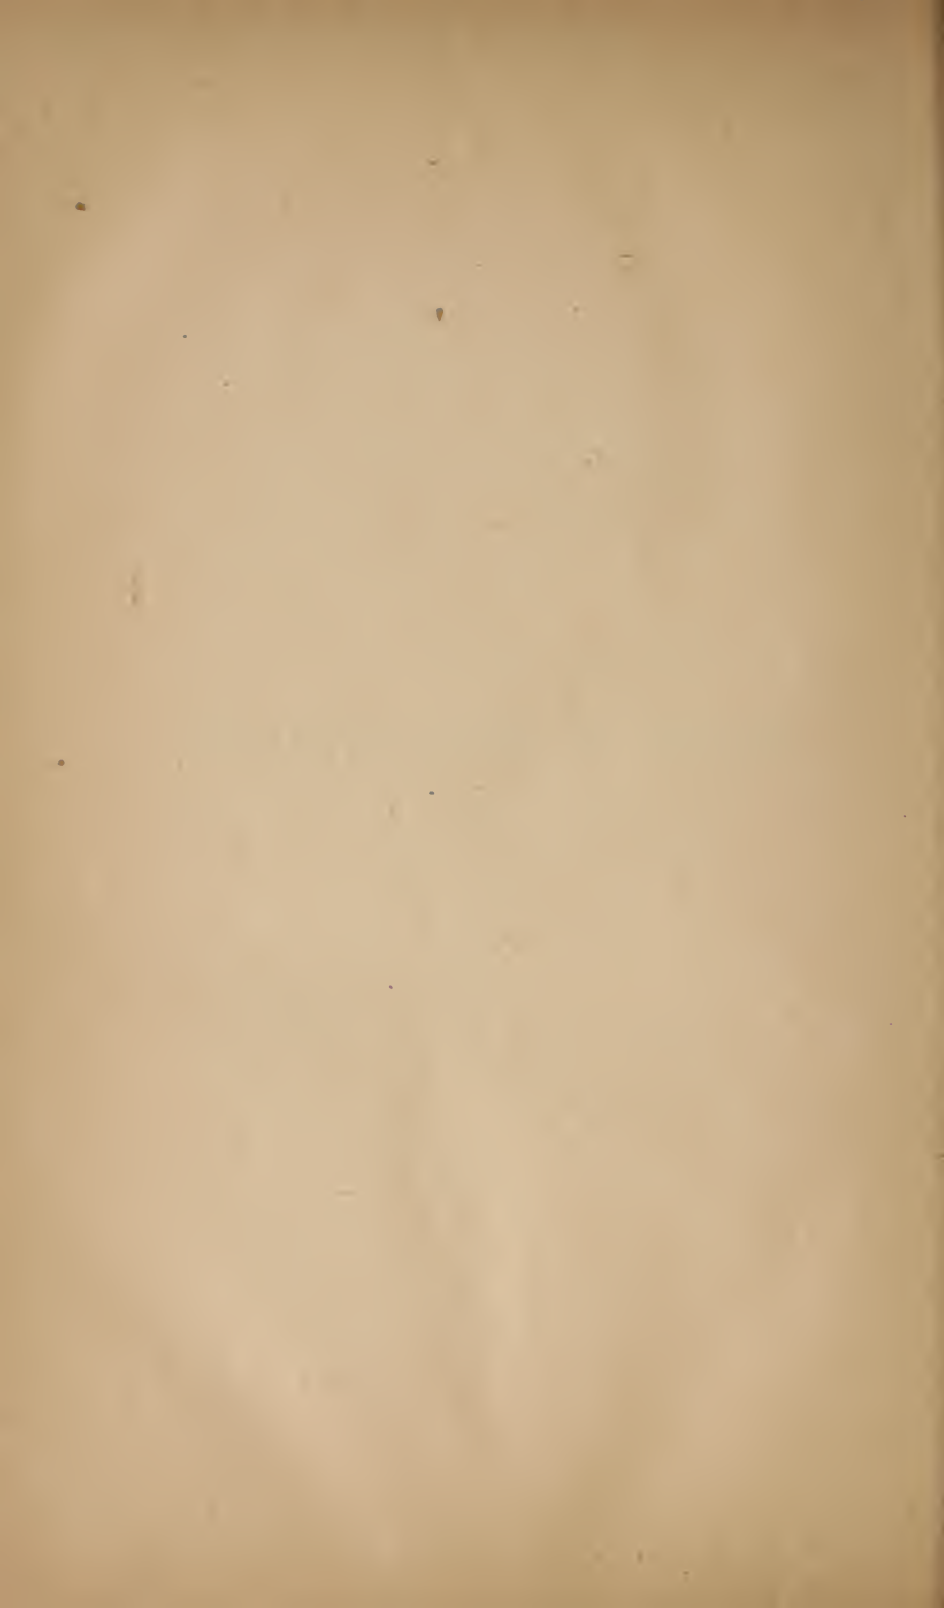

Until the town establishes its system of sewage, it was deemed best to use earth closets. These, being systematically cared for, are giving entire satisfaction.

The appearance of water in the north-west corner of the building, and in the boiler-pit, during the thaws at the end of December and the end of January, is due to the cropping-out of springs, or, more properly speaking, underground water-courses from the granite ledges lying to the north of the school-building, of which there was no surface evidence before excavating. After an examination by Mr. Whitman, drains have been dug under his supervision, which will control the water and do away with the annoyance.

The members of your Committee take pleasure in thanking Messrs. Cabot & Chandler, the architects, for their able, conscientious, and courteous services rendered in connection with the construction of this building.

REPORT OF SUPERINTENDENT.

REPORT OF SUPERINTENDENT.

TO THE SCHOOL COMMITTEE OF QUINCY:—

In accordance with your requirements, the following is submitted as my Fourth Annual Report — constituting the twelfth in the series prepared by the Superintendent of Schools. Defering, for the present, all discussions of a general nature, I proceed at once to the mention of several individual matters of importance.

ATTENDANCE.

Complete information as the attendance of pupils may be gathered from the table to be found on subsequent pages of this report. Such as it is, the record is made up for the year, and cannot be changed. We may very profitably, however, recall the leading ideas which for more than a decade have determined our policy in this matter of attendance. I am glad of an opportunity to re-state these ideas in print, because it is constantly found necessary to impress them upon new teachers. I quote the substance of certain paragraphs in Mr. Parker's first report:—

1. "Pupils who attend irregularly not only derive very little positive benefit from school themselves, but disturb and lessen greatly the advantages of the other members of their classes. *The success of a school is indicated, in a great degree, by the per cent of attendance.*

2. "Pupils should never be encouraged to attend school when sick, or in any way incapacitated for school work.

3. "Pupils should always be required to bring from their parents a written excuse for absence.

4. "Every case of truancy should be carefully and persistently treated. The blame for any neglect in this regard will fall upon the teacher.

5. "The principals and teachers *should spare no pains in keeping in school all children legally required to attend.*

6. "All possible and proper means should be used to interest and encourage dull and backward pupils, — great care taken not to discourage them.

7. "Truancy and irregularity of attendance can best be prevented by making the schoolroom attractive. Good, wholesome, normal instruction, a mild, firm government, and a proper amount of exercise, — in other words, *SUNSHINE* in the schoolroom, — will do more to keep children in school than all other means put together."

Ten years' experience has proved to us the soundness of these views. Our adherence to them has produced results which, as a whole, are very gratifying. It may justly be observed, that while the above citation throws the whole burden of securing and maintaining good attendance upon the teachers, at least an equal responsibility rests upon parents and guardians.

Great pains have been taken to secure the co-operation of parents in all necessary instances. In most cases they have been found ready to afford the needed assistance. Two years ago the annual school report contained those sections of the Public Statutes relating to the employment of children. Employers of labor in manufacturing, mechanical, or mercantile establishments are again reminded that no child under ten years of age can be legally employed in such establishments; that no child under sixteen years of age can be legally employed until he presents such certificate as is called for by the sections just referred to. A considerable penalty attends each violation of this law; and in order that ignorance of its provisions may not lead to its infringement, it has seemed to me well to once more direct public attention to them.

NO-SCHOOL SIGNALS.

Although we have for some time employed the fire-alarm system to indicate no session of school in stormy weather, no explanation of the plan in use has hitherto been made in a school report. The signal 2-2, rung three times at 8.15 A.M., indicates no morning session of school; the same signal at 11.30 A.M. indicates no afternoon session. At 11.30 it is sometimes scarcely possible to determine the condition of the weather for the afternoon, and it has been suggested that 1.15 P.M. would be a better hour for the signal governing afternoon attendance. While these signals generally secure uniformity of sessions in the different schools of the town, permission is given the principals to dismiss at noon pupils of the lower primaries whenever weather or walking demands it. It has frequently come to my notice, that a storm which seemed quite moderate at the Centre was very severe in the Atlantic and Washington districts, and my judgment in the use of the no-session signal has been influenced by this knowledge.

Many of the pupils are but poorly protected from the severities of our winter season. A special regard for such pupils is necessary. While we are duly mindful of the health of all, it seems to me that a little care should be used that we do not too much encourage effeminacy.

FREE BOOKS AND SUPPLIES.

In obedience to the legislation of 1884, text-books have thus far been supplied to three of the four grammar classes, and to all High School pupils. All books used in the primary classes have been purchased by the town. With the purchases incident to the opening of school in September next, we shall have a complete equipment, which of course will, year by year, need replacing. As I have before reported, the books are carefully used, and a due economy has been exercised in the consumption of supplies. Thus far the free text-book plan with us has been entirely successful. It will in the future meet with some obstacles, which need not be anticipated, and which wise management will overcome. As compared with the great majority of schools in Massachusetts, our own are well equipped with appliances for teaching. If the mere possession of these conveniences determined the excellence of the schools, we should indeed be well off. Useful, nay indispensable, as are these aids, it must never be forgotten that it is good teaching, and good teaching only, which is the efficient cause of good schools. It is easy to secure the apparatus of one sort or another needed by the skilful teachers. No very extravagant outlay of money is necessary for this purpose; but to find *skilled teachers* is always a matter of difficulty, and once found they are often beyond the control of our rather modest purse.

It should be observed, that I speak of our schools as well equipped in a comparative sense only. There is yet very much that is needed in the way of books of reference, books for teachers' reading, pictures, simple apparatus, etc., before we reach any thing like an ideal equipment. Each year we succeed in making some slight additions to our previous stock, but each year's absolute necessities make so great demands on the annual appropriation that we are obliged to forego the purchase of much that would be permanently useful. New Bedford's schools are blessed by a certain Howland Fund, the income of which is annually expended for just such luxuries — if I may use this term without misleading — as come a little beyond the reach of public funds. If, in the future, Quincy should experience such liberality as has not been entirely unknown to her past, the establishment of such a fund as the Howland Fund of New Bedford would be a most beneficent act.

MUSIC.

The practical outcome of the discussion of music in last year's report was the engagement of Mr. Lewis T. Wade to do for the interests of this branch of study what had already been

so well done for the drawing by Mr. Carter. Mr. Wade entered upon his duties on April 27, an arrangement having been made with him for the ten remaining weeks of the term. At the end of this time the experiment presented such fair promise of good results, that you saw fit to authorize the engagement of Mr. Wade for an entire year. He gives to our schools three days of each week. Merely indicating my own satisfaction with what is already accomplished, and what the future holds in store for us, I leave Mr. Wade to speak more in detail of his own work. While freely admitting our obligations to the gentlemen whose special charge the music and drawing have been, I wish to also direct your attention to the intelligence and zeal with which the whole body of our teachers have taken up these hitherto unfamiliar branches. To their hearty efforts, no less than to the intelligence of the two special instructors, is the town indebted for the good results which have been secured.

Mr. Wade's report is as follows:—

“A musical education, so far as regards vocal music, should produce the following results: First, The ability to read music as easily and correctly as printed language. Second, The growth and improvement of the voice through a proper use of the respiratory organs and the organs of speech. Third, The appreciation of the *soul* of music, or a knowledge of the art of expression, both as regards music and words. Fourth, A certain mental and moral character, gained largely through the *quality* of the music sung. Thus far, in Quincy, the work of the teachers has been principally directed to accomplishing the first of these results, with such attention to the voice as the character and ability of the pupils would permit. The system of instruction followed is that originated by H. E. Holt of Boston, the music studied being that comprised in the books and charts of the ‘Normal Music Course.’

“As little or no instruction in music had been given in any grade, it was considered best to confine the study for the first two months (May and June, 1886) to the *pitch* of sounds alone. At the beginning of the present school-year, in September, the study of *time* was begun and since that time the greater part of the grammar schools have sung the studies for one and two voices contained in the first and second series of charts; and at the present writing (Feb. 1) many of them have nearly finished the studies and songs contained in the first section of the Second Reader. At the close of the present school-year, most of the grammar-schools will have sung the music contained in the second section of the Second Reader, and will have the ability to read music of ordinary difficulty written in three parts. The various primary schools are at different stages of the work above described. In the High School, the music studied is written in three parts,—for bass, soprano, and alto; and, as elsewhere, thus far, has been of such

a character as to give the ability to read music at sight. In all the grades the endeavor is to give individual ability, and to secure independent thought and action. *Imitation* is not tolerated in any department of the study.

“I cannot speak too highly of the intelligence and enthusiasm with which the teachers have prosecuted this work. With such co-operation, success is assured.

“L. T. WADE.”

DRAWING.

It is five years since systematic instruction in drawing found its place in our schools. At that time Mr. Charles M. Carter entered the service of the committee as special instructor in, and supervisor of, this department. Drawing in our curriculum has been regarded in the same light as the other branches of study, viz., as a *means* for the education of the pupils. Mr. Carter's first duty was to familiarize our teachers with the subject, to the end that they might be able to teach it well. This duty has been a continuous one because of the frequent changes among the teachers, and because each year has called for more advanced instruction. In two brief reports Mr. Carter has presented you with outlines of his aims and methods. During four years after its introduction, the interests of the drawing steadily progressed. In January last, however, ill health compelled Mr. Carter to ask for leave of absence, and with the exception of a few weeks in May and June we have since been deprived of his services.

Up to the summer vacation, his classes at the High School were taught by Miss Fannie H. Smith. They are at present in the charge of Miss Jessie N. Prince, who is also engaged in overlooking the work of the other schools.

EVENING DRAWING SCHOOL.

To each of the drawing classes organized in the autumn of 1885 a course of sixty lessons was given; and on the evening of April 17, the work of the students was put on exhibition in the Lyceum Room of the Town Hall. Nineteen members of one class, and eighteen of the other, having creditably completed the work of the year, and successfully passed the required examinations, received certificates of the following form:—

QUINCY PUBLIC SCHOOLS.

FREE INDUSTRIAL EVENING DRAWING SCHOOL.

This is to Certify that.....
having executed all the drawings and passed all the examina-
tions in.....Drawing at the QUINCY FREE
EVENING DRAWING SCHOOL, is entitled to

THIS CERTIFICATE

FOR THE COURSE OF ONE YEAR'S INSTRUCTION.

This result has been recorded towards a full diploma to be
given for the course of instruction when completed.

BY AUTHORITY OF THE SCHOOL COMMITTEE.

.....Supt. of Schools.

.....Instructor.

QUINCY, MASS., ...

As the time approached for the organization of the present classes, the matter of their location was duly considered, and the continued occupancy of the upper room of the Hardwick Block determined upon. The thirty-seven certificate men of last year were notified to attend on the evening of Tuesday, Oct. 19, if they desired to avail themselves of a second year's instruction. Twenty-six men presented themselves at that time, and began work under the direction of Mr. Thomas E. Sweeney, one of last season's teachers. This class has thus far (Feb. 1) had 43 meetings, with an average attendance of 19 students.

At my request Mr. Sweeney furnishes the following outline of the work of this class:—

Advanced work in (1) Geometry; (2) Projection with sections and intersections; (3) Isometric with shadows, and Elementary Perspective, Monumental Designs.

For admission to the first-year class, applications have been received from sixty-five individuals, and it has been found possible to offer the privileges of the school to fifty-seven of this number. It will be remembered that we can accommodate forty students at one time. We have adhered to the rule that unexplained absence for three consecutive nights would forfeit a student's seat, and have thus proffered the privileges of the school to as many as possible.

This class met for the first time on Monday, Oct. 25. It has thus far had 42 sessions with an average attendance of 30. Ill health prevented the return of Mr. Church, who taught in the school last winter, and Mr. C. F. Edminster was selected as his successor. We seem to be accomplishing all that is possible with our present appropriation and present accommodations. A very decided majority of the students are connected with the granite industry, and, to the end that the school may meet their needs as completely as possible, any suggestions looking to the increased efficiency of the school will be heartily welcomed, and carefully considered. It has occurred to me, that men of long experience in the granite business might give us some hints of decided value.

SCHOOL ACCOMMODATIONS.

A Quincy school report which did not of necessity contain some reference to this topic would be a novelty. Experience teaches, that, as much time is required before real needs are supplied, it is the part of wisdom to bring very early to the notice of the town such necessities as can be readily foreseen. So much time is certain to be consumed in the discussion of ways

and means, that we often suffer grave inconvenience before all necessary steps are taken. In the light of these considerations, it is not too soon to consider the question of future accommodations for the pupils of the

WOLLASTON SCHOOL.

The following table shows the average membership of the school for a period of twelve years:—

Year ending Jan. 1, '76,	88	Year ending Jan. 1, '82,	138
“ “ “ “ '77,	93	“ “ “ “ '83,	153
“ “ “ “ '78,	117	“ “ “ “ '84,	155
“ “ “ “ '79,	119	“ “ “ “ '85,	157
“ “ “ “ '80,	133	“ “ “ “ '86,	164
“ “ “ “ '81,	147	“ “ “ “ '87,	170

From the above figures it appears that the size of the school has about doubled in the dozen years covered by the table. Wollaston is a growing village, and a much less rapid increase than is indicated above will soon carry us beyond the capacity of the present building. The committee will doubtless remember that the most competent authorities insist on twenty square feet of floor area, and three hundred cubic feet of space, for each pupil in a model schoolroom. The present building at Wollaston contains five rooms. Judged by the figures just presented, its D primary room will accommodate forty-five pupils; each of the others, thirty pupils; a total of one hundred and sixty-five pupils. It must also be remembered, however, that we cannot divide the pupils arbitrarily so as to secure the best hygienic conditions. While the principal's room contains pupils of the A grammar grade, and Miss Gurney's room pupils of the D primary grade, each of the other rooms has necessarily been occupied by two classes. The greatest inconvenience has been experienced in Miss Chandler's room, which has this fall contained fifty pupils, with an allowance of about twelve feet of floor area and one hundred fifty feet of cubic space to each pupil. The aisles between the rows of desks are but 17 inches, while they should not be less than 22 inches. Between the rear seat and the wall is a space 22 inches in width; between the front desk and the wall, a space $4\frac{1}{2}$ feet in width. To avoid any misunderstanding, I perhaps should repeat that the figures used above, twenty and three hundred, as indicating the proper amount of floor area and cubic space, apply to model schoolrooms. Judged by them, most of our schoolrooms would be condemned, because our necessities have compelled us in a multitude of instances to assign more pupils to a

room than it was fitted to contain. The conclusion seems inevitable, that Wollaston must in the near future be provided with increased accommodations, and that it is not too early to discuss the means of securing them. If we may judge the future increase by the past, some nine rooms will be needed at the end of another decade, and surely ten years is not too long a time to have in mind when planning for the future of a school. I venture to suggest, then, to the committee, that the present building be allowed to remain as it is. The difficulty and expense of remodelling will be great, and cannot result in a satisfactory building. As an alternative, I should propose the erection on the present lot, of a four-room wooden building, built on such a plan as to secure the advantages possessed by the rooms of the John Hancock School. These rooms should be large enough to amply accommodate the primary grades, and the smaller rooms of the present building could then be used for the grammar classes, which are almost certain to contain fewer pupils.

JOHN HANCOCK SCHOOL.

The plan of half-time attendance for the lower primaries of the Adams and Willard districts, adopted of necessity in April, 1885, was of necessity continued through June, 1886. In September the new building was ready for occupancy. We may not claim for it architectural beauty, but we may confidently assert that in point of interior arrangement and of conformity to proper hygienic conditions, it is a great advance upon any school building previously erected in Quincy. The eight rooms contained in it are of uniform size, and, from their common location on the southerly side of the building, equally favored with sunlight. They are heated by indirect steam radiation, and, in addition to other means of ventilation, two good-sized transoms in each room connect with the long corridor which runs the entire length of the building. Each of these schoolrooms is $36\frac{1}{2}$ feet in length, 25 feet in width, and 12 feet in height. We may assign forty-five pupils to any one of these, with an allowance of 20 square feet of floor area, and 243 cubic feet of space, to each pupil. Each room is lighted by five windows measuring 7 by 4 feet; the total area of glass being .15 of the floor area. It will be remembered that .17 expresses the ideal relation of the former to the latter.

The financial estimates made one year ago contemplated the furnishing of four rooms in the new building. These being insufficient to accommodate the pupils transferred to the building, a fifth room was equipped and occupied early in October. Seats

for sixty pupils have been put in each of the three lower rooms. While we may feel that necessity compels the assignment of this number of primary pupils to a room, it should not for a moment be forgotten that the number is twice too large. As our previous reports have many times stated, no more than thirty pupils of such grade should be assigned to a teacher.

Pupils of the B, C, and D primary classes have thus far been sent to the John Hancock School. The territory from which these pupils have been drawn is as follows:—

. . . All that portion of the Adams district lying south of Water Street and west of the railroad, west of Pleasant and Fort Streets, and all of Granite Street and the territory to the north thereof; that portion of the Willard district lying to the east of Common Street, to its junction with West Street, and of West Street to the Old Colony Railroad, and of said railroad to the Braintree line.

While these lines were chosen with great care, in a few cases they may have entailed some hardship. Common Street was chosen as the westerly limit of the new primary district, because it was about the right distance from the new building, and no other dividing line can well be drawn. All pupils on Common Street remained at the Willard. The hardship above referred to seemed to come upon a few families living a short distance to the east of Common Street, and on that account coming into the Hancock district as above described. It will be necessary, with the coming of spring, to occupy one or more additional rooms of the new building. As evidence of this necessity, I give herewith the numbers of pupils connected with each of the five classes already organized:—

Miss Jackson's	58
" Boyd's	54
" Underwood's	62
" Parker's	63
" Hall's	64
	301

Saying nothing of the children who will enter school for the first time in April, those already enrolled as above indicated afford most ample employment for six teachers instead of five as at present.

Lest it may be supposed that the Adams and Willard Schools have become unduly reduced in size by the opening of the new building, I append tables showing the number of pupils connected with each class of both those schools:—

ADAMS SCHOOL.				WILLARD SCHOOL.

HIGH SCHOOL.

The last graduating class from this school, June, 1886, numbered twenty-five, of whom two were boys. This class, on entering the school in September, 1883, contained fifty-two pupils, of whom fifteen were boys. The ratio of the number graduating to the number entering was forty-eight per cent. The present size of the school is as follows:—

		Boys.	Girls.
Advanced class	. . . 7	0	7
First class	. . . 17	4	13
Second class	. . . 36	13	23
Third class	. . . 63	8	55
	123	25	98

For the year ending Jan. 1, 1887, the average membership of the school has been 113, the average daily attendance 107; these figures being the largest in the history of the school. Much care has been taken during the year, to inform the parents of such pupils as were not doing satisfactory work in the school. An occasional pupil has been advised to take up the work of a lower class, or to withdraw from the school. Last year the school had no advanced class. In September, 1886, nine of the last class to graduate chose to return to the school, and seven of the number still continue in attendance. Before the opening of another school year, I hope the committee will see fit to have two definite, but not entirely distinct, courses of study mapped out, one covering four years, the other three years. The work of both courses for the first year might well be identical. At the end of this year, I would have pupils decide upon the course thereafter to be followed. This will do away with the uncer-

tainty which now attends what has been spoken of as the advanced class, and place it upon the same footing as the other classes of the school. The teachers of the High School are very fully occupied. From its large size, the third class has necessarily recited in sections, and the number of recitations has been increased by the presence of the fourth-year pupils. Each teacher of the school should have at least one vacant period every day. Such time is needed in preparing for future recitations, in rendering assistance to individual pupils, and for other essential purposes. I suppose the future size of the school may be somewhat affected by the opening of the Woodward School for girls. Even if its growth should be thereby lessened, it is desirable that we do not lose sight of improvements which are very much needed. Two years since, I went into this matter quite fully; and it may now suffice to call the attention of the board once more to the faulty interior arrangement of the building, to the absence of means of ventilation, and to the urgent need of provision for a school library and for laboratory work.

A SCHOOL MANUAL.

Three years ago, in the first report which I had the honor to present to the Committee, I adverted to the fact that no course of studies, embodying the lessons of the last few years, had been prepared for the use of the schools. There is experienced the increasing need of a good school manual, which should be made up somewhat as follows:—

1. It should contain a brief statement of such rules and regulations as the Committee deem necessary.

2. It ought to contain a simple outline of such general principles of psychology as every teacher needs to comprehend.

3. The *ends* at which teachers should specially aim ought to be clearly set forth.

4. The *methods* which have been found most successful should be fully outlined.

5. The amount of work assigned to each grade, in each branch of study, should be clearly indicated. To this outline, very much of detail and suggestion should be added.

6. This manual should set forth very clearly the principle on which our schools are organized: e.g., the Coddington is *one school*; it contains various classes, located in different rooms, but they all comprise one institution; of this institution, the principal is desired to be the head in fact, as well as in name; associated with the principal, unitedly working with her for common ends, are the other teachers of the school.

7. It should state with equal clearness our belief in regard to all matters pertaining to the attendance of pupils.

8. It should indicate very plainly the results to be expected from school-government, and set before teachers the leading features of the type of control in which we believe.

9. This manual might usefully comprise a list of the best articles and books for teachers' reading, besides hinting at other means which enterprising teachers should use for their own improvement.

The foregoing is not set forth as an exhaustive enumeration of the contents of our needed manual, but as somewhat indicative of their character. It may fairly be inquired why such a manual has not been prepared before this time. As was remarked three years since, to write a manual which shall do substantial justice to the best work accomplished in our schools, and thus be in some measure suited to their past reputation, is an undertaking involving a great amount of knowledge, skill, time, and labor, and a considerable expenditure of money. Once prepared, it would for several years save the time and labor now consumed in acquainting new teachers with many subjects which are now matters of tradition and custom rather than matters of record. It would not be many years, doubtless, before our experience would point out many possible improvements, and then revision would be necessary.

TRAINING CLASS.

A recent able writer remarks that "*teaching is not a knack or an artifice, the secret of which may be acquired, like that of swimming or dancing, in a short course of lessons.*" I am often compelled to emphasize the truth of this remark. It happens, sometimes, that a young lady, being placed as a learner under the direction of one of our most skilful teachers, at the end of a short time applies for transfer to another room, seeming to feel that in a few short weeks she has exhausted the opportunities presented her. If said young lady were possessed of positive genius, it might be that she would acquire thus quickly, what has come to the older teacher as the result of long thought, observation, reading, and practice. In another connection I may have occasion to say something of the desirability that right views—not unworthy ones—of the teacher's work should prevail. In many places of more considerable size than Quincy, regularly organized training schools are maintained. The necessity of such schools for observation and practice is recognized by the normal schools. Believing that the training classes,

organized in each September of recent years, have served a useful purpose, the usual examination for admission was held at the Coddington School building on Sept. 11. I am far from the expectation that all persons connected with these classes will become successful teachers. The usefulness of the class may in part consist in preserving the schools from the mis-directed efforts of those who might render good service in other fields of usefulness, but who were clearly not intended for teaching. I have continued to urge attendance at the Normal School, upon the graduates of our High School, rather than an immediate entrance upon the work of the Training Class, and this for reasons set forth in an earlier report. I find, upon inquiry, that twenty-nine of our present corps of teachers received some part of their preparation in our own training class. The following named persons have been members of the last class: —

Jennette M. Billings.
 Marie E. Boland.
 Delia T. Brady.
 Martha Buckley.
 Eloise M. Chamberlin.
 Nellie M. Conway.
 Alma J. Cook.
 M. Beulah Cook.
 Mary E. Crotty.
 Nettie Cushman.
 Jane Farquhar.

 Lillian L. Watts.
 William A. Reed.

TEACHERS.

Fifty-eight teachers — assistants not included — are now employed in the schools; an increase of five, since the beginning of the year. On a subsequent page may be found a complete statement of such changes as have occurred since our last report was issued. It will be observed that thirteen teachers have left the service of the town, four principals being included in the number. To my own mind, the happiest feature of the history of our schools for the past dozen years is the constant effort put forth by the school authorities to secure better teach-

ing ; the constant efforts of our instructors to become better teachers. Our teachers have been selected because of their fitness for the work which they were to undertake ; not, as too often happens, because they were connected with a certain church, or because they moved in certain social circles, or because they possessed influential friends. All other things being equal, we may readily admit that residents of Quincy should be preferred in the selection of teachers. We cannot, with safety to the schools, admit, however, that any person has a *claim* upon any position which may chance to be vacant. Rather let us believe that the position has something of a claim upon that person who is so well fitted for it as to render the most useful service. Our teachers are the immediate cause of the great good which the schools are all the time accomplishing. Their money compensation is no adequate return for the service which they render the town ; and I am always glad of an opportunity to ask for them that generous public appreciation and encouragement which they fully deserve.

As I approached the preparation of this report, an inquiry very naturally arose as to its function. What purpose is a school report to serve ? As its name indicates, it should set forth clearly such information as to the condition and needs of the schools, as time and circumstances demand. But should it not do more ? The schools of a community will be found to answer quite exactly the ideals existing in such community as to what schools should be, and what they should accomplish. The heart of the public is most undeniably loyal to the cause of public-school education ; but it is essential that the public mind should have right conceptions of what schools ought to be. Mr. A and Mr. B may be equally friendly to the school system of their town. Mr. A is satisfied with the schools as they are, because they come up to his conception of good schools ; Mr. B is dissatisfied, because he sees clearly how much better the schools might be made. Now, public opinion is not the opinion of the most intelligent and competent judges, but the united opinions of all the men and women of a community, rich and poor, wise and foolish, foreign and native born. This great power—public opinion—is always in need of guidance and enlightenment ; and, if I do not err, our school reports fail of accomplishing their proper mission if they do not attempt something of this work. But again, and even more directly, a given body of schools will be found to answer to the ideals of the men and women who teach in them. It has seemed to me, therefore, that I might usefully conclude my own portion of this report with a very brief statement of some of the qualities which

should be found in the ideal teacher. Such a course may result in a slightly fuller public appreciation of the high qualities which a teacher should possess, a livelier sense of the importance of the work he undertakes, and the exercise of sympathy and helpfulness in the difficulties which attend his labors. It may also serve to direct the attention of teachers to those qualities which they should desire to possess, to those ends which they should aim to accomplish, and to the means by the employment of which their purposes are to be realized.

Let me begin by suggesting those qualities and excellences which are desirable for the teacher, when considered merely as an individual: viz., the possession of good health, a firm control of temper, true refinement in manners, language, and dress, —all based on real moral worth; love of children, and sturdy common sense. It is fortunate if the individual enters on the work of teaching from choice: he is then likely to be ambitious for success, and to prosecute his work with that enthusiasm which is an almost certain assurance of it. Next, I would have him realize the dignity of the work he is undertaking, and the necessity of adequate and special preparation for it. This will include a thorough mastery of the subject matter which he proposes to teach; a study of those principles which underlie right methods of teaching; the acquirement of skill in the use of these methods; and the ability to control and manage a class. He will make a special study of the children themselves, and strive to obtain some adequate conception of what it is to educate them. He will come to see that they have bodies to be cared for, minds to be developed, and moral natures to be trained. He will come to feel the force of these and many kindred truths: Faculty of any kind is developed and strengthened by judicious exercise; Habit is the form which all true education takes. He will come to realize that it is pupils whom he teaches, and not subjects. He will regard the arithmetic, geography, and grammar, as the *means* which he is to employ in training his pupils. His school discipline will not be a hap-hazard matter; but will be the outcome of a further study of principles, and an inquiry as to the motives by which children are influenced, and to which appeal may rightly be made. Although engaged in teaching, he will be all the time a learner, realizing that "the one thing he dreads most in his pupils, he should dread most in himself, — stagnation, acquiescence in routine, torpor of mind, indifference to knowledge. When his own soul loses the receptive faculty, ceases to give a joyous welcome to new truth, he will be sure he has lost the power of stimulating the mental activity of others, or of instructing them to any real purpose."

When we consider the difficulty and gravity of the task we are undertaking, the preparation of the best of us is inadequate enough. Our condition is hopeful, however, so long as we are aware of this, and not blind to it. Our schools will always be in need of teachers of such qualities and purposes as I have so very imperfectly indicated; of teachers of such power and skill, as to obtain the best efforts of their pupils. I might multiply opinions of the greatest minds, as to the dignity of the teacher's work, but content myself with the following quaint expression: —

“If I could relinquish the office of preacher, there is no office which I would more willingly have than that of schoolmaster. For I know that this work, next to the office of the preacher, is the most profitable, the greatest, and the best. Besides, I know not even which is the best; for it is hard to make old dogs tame and old rogues upright, at which task the preacher's office labors, and often labors in vain. But young trees be more easily trained and bent, howbeit some should break in the effort. Beloved! count it one of the highest virtues upon earth, to educate faithfully the children of others, which so few and scarcely any do by their own.”

In times past, schools have suffered beyond estimate, by the application of the *poeta nascitur non fit* doctrine to the teacher. In recent years, our own schools have been in good degree preserved from the terrible consequences of such doctrine. Without taking time to demonstrate its absurdity, as may so easily be done, I would remind you of the reply of the celebrated French oculist, when some one complimented his skill in operating on the eye: “Yes,” said he, “I may have some skill now; but I spoiled a hatful of eyes in learning.”

The usual information in regard to the expenditures for the year will be found on succeeding pages.
